

## Home Learning

At All Saints, each morning starts bright and early with both KS1 and KS2 children completing their **Fluent in 5** calculations. These daily arithmetic questions will not only wake up your child but will support them in building number fluency & confidence in just 5 minutes a day!

Each day class teachers will also set a main Maths activity from the **White Rose Hub**. There will be a daily video and/or powerpoint with clear instructions given to guide your child through the lesson. All Maths sessions will be set first thing in the morning through the class Seesaw account and class teachers will be online for further support. Both KS1 and KS2 children are asked to write on the worksheets provided, either by editing the template online, printing off a copy of the sheet or using their own books to record their learning.

Children are then encouraged to upload their completed learning task each day so that their teacher can provide feedback, track your child's progress and celebrate their learning.

Our love of Maths also continues into the afternoon, with class teachers allocating time for online activities to be completed independently by your child.

For EYFS and KS1 this will include approximately 15 minutes on **Numbots**. The maths games link to stories to support children's understanding of mathematical concepts. The class teacher will also be able to track your child's progression as they move through the skills.

For KS2 classes, children will be asked to complete approximately 15 minutes on **TTRockstars** each afternoon for times tables practise. This is differentiated for each year group and/or individuals. Children can earn points, set themselves challenges and also compete in class and whole school competitions.

In addition to TTRockstars, children in KS2 will be set a **Maths Shed** session or will be invited to take part in the Maths league. For approximately 20 minutes each afternoon, the children will be focusing on vital number work and developing fluency in basic skills through the online game.

For all online home learning tasks, please contact your child's class teacher via Seesaw if you need another copy of your child's logins and/or passwords.

For EYFS, the class teachers will set daily Maths activities for your child through Tapestry. Each week, the children will be focusing on a new number and will explore this at home through practical methods. The children will be encouraged to make the number using different objects, draw the amount in different ways and identify it in shape, space and measure activities. There will be lots of fun ideas shared by the teachers to support your child's learning. Where possible please share photographs and interact with your child's tapestry account so that the class teacher can track your child's progress and celebrate their learning.

Here are some additional resources for Maths home learning which we feel will support your child even further at home. Please feel free to use them if you wish! If you have any questions, please ask your child's class teacher.

- Downloadable **White Rose Hub homework booklets** for parents and children to use at home for Years 1 – 6. <https://whiterosemaths.com/homelearning/>

- **Maths Party 2020** resources which contain Virtual Party bags with Maths ideas to use at home including: hands on fun, printables, videos/songs, online games and helpful advice for parents. (EYFS/KS1/KS2)

<http://www.liverpoollearningpartnership.com/mathsparty2020/>

- Lots of fun Maths resource, games and videos on **BBC Bitesize**. There are also Primary catch up lessons too. (Years 1-6)
