

At Marine Park Primary School, we value education in the broadest sense because it has the power to change and improve people's lives. We believe that every child really does matter, and so their full potential is met, we will ensure they have the opportunities and experiences to;

Feel Safe

- From bullying and discrimination
- From neglect and violence
- From crime and anti-social behaviour
- From injury or harm
- Have security, stability and are cared for

Be Healthy

- By enjoying a healthy lifestyle
- By enjoying physical activities
- By being mentally and emotionally healthy

Enjoy and Achieve

- By providing a wide range of experiences which will help all pupils to develop lively inquiring minds, to question and argue rationally and to strive to achieve success in all aspects of school life.
- By inspirational teaching which will lead to aspirational learning
- By caring for our families, friends and school.
- By sharing our time, talents and aspirations.
- By encouraging pupils to work and play together.
- By providing a stimulating and interesting environment which will help every pupil to acquire the knowledge and skills relevant to life in a fast changing world.

Aspire and Contribute

- By harnessing our energies and commitment in active and challenging partnerships.
- By equipping the children with the skills to live a full life and with the attributes and values to contribute fully as citizens. These will include valuing themselves and each other.
