 Google Drive File Stream	<p>Drive File Stream</p> <p>With Drive for desktop, you stream your Drive files directly from the cloud to your Mac or PC, freeing up disk space and network bandwidth. Because Drive files are stored in the cloud, any changes you or your collaborators make are automatically updated everywhere. You'll always have the latest version.</p> <p>You can also make Drive files available for offline access. These cached files sync back to the cloud when you're online, so the latest version is available on all your devices.</p>	<p>We encourage students to download this onto PCs/Laptops at home so that when they are working they can save work and it automatically uploads so that they can access in school. This is ideal for coursework subjects such as ours in ADT where they can be working on a piece for a long period of time.</p>	Students
	<p>Pinterest is a visual discovery engine for finding ideas and inspiration. When you discover pins that you like you can save them onto boards that you can create. Brilliant for research and inspiration as well as techniques.</p>	<p><a href="http://www.pinterest.co.uk">www.pinterest.co.uk</a></p> <p>This is recommended for A Level students but not compulsory. They can sign up to this with their own personal details and create their own pin boards of inspiration.</p>	Student

	<p>Procreate is a digital drawing platform available for Apple products. There are various free brushes you can download from the web to give you a variety of techniques.</p>	<p>This can be used to create both still and moving images including short animations or GIFs.</p>	<p>Student</p>
	<p>Mindnode is a great tool to help you create mind maps for your projects digitally. It is very easy to use and gives you a variety of choices when creating in depth ideas and plans.</p>	<p>You can download the app and create a free account. It stores a copy of all of your Mindmaps on the app or you can download them and input them onto a presentation.</p>	<p>Student</p>
	<p>Vectornator allows you to create sleek vectors within the app. It comes with a variety of tools and settings that you can play with to create your vector images.</p>	<p>Download the app and get started. I believe you have to pay to upgrade the features however there is plenty on there for free to play with. This would work for any ADT subject depending on what you are creating.</p>	<p>Student</p>

	Paper created by Wetransfer allows you to create sketchbooks using drawing, collage and type. You can keep individual journals or one large journal.	You get limited access to certain tools or alternatively it cost you £9 for the year to have unlimited features and journals.	Student
	Lightroom- for mobile/pc/mac allows you to edit photographs at home or on the go.	Free using the school subscription to Adobe. You can download it onto your device. Is beneficial to any students who need to digitally edit or correct photographs.	Student
	Artweaver Free enables you to create beautifully realistic digital drawings by taking input – from your mouse, a stylus or, if you have a touchscreen PC, from whatever you feel like tapping the screen with – and applying ultra-realistic brush effects.	Great for any sort of product design or developing a 3 dimensional idea. “Artweaver Free is designed for artists of all ages, but we’ve found it particularly useful for children. Kids love experimenting with all the different brushes, and we love not having to clean up any mess afterwards.”	Students
	This website is where many artists/illustrators display their work/portfolio.	<a href="https://www.illustrationx.com/us">https://www.illustrationx.com/us</a>  It is great for students to see many contextual sources in one place and is used to inspire their own work.	Students
