

CAMPUS CALENDAR 2023-24

Faculty of Business, Computer Science and ICT - KS5 computer science - Year 13

1	<u>Paper 1 topics for this half-term:</u>
2	<ul style="list-style-type: none"> • Recursive techniques
3	<ul style="list-style-type: none"> • Object oriented programming
4	<ul style="list-style-type: none"> • Implementing stacks and queues
5	<u>Paper 1 assessments this half-term:</u>
6	<ul style="list-style-type: none"> • Paper 1 assessment 1 - recursive techniques and OOP
7	<u>Paper 2 topics for this half-term:</u>
8	<ul style="list-style-type: none"> • Revision of number systems, bases and binary
9	<ul style="list-style-type: none"> • Revision of data representation
10	<ul style="list-style-type: none"> • Hardware and software
11	<ul style="list-style-type: none"> • High and low level languages
12	<ul style="list-style-type: none"> • Translators
13	<ul style="list-style-type: none"> • Boolean algebra and truth tables
14	<ul style="list-style-type: none"> • Internal and external hardware
15	<u>Paper 2 assessments this half-term:</u>
16	<ul style="list-style-type: none"> • Paper 2 assessment 1 - data representation
17	<ul style="list-style-type: none"> • Paper 2 assessment 2 - all topics covered in the term
18	Mid Term Break
19	<u>Paper 1 topics for this half-term:</u>
20	<ul style="list-style-type: none"> • More on implementing stacks
21	<ul style="list-style-type: none"> • Implementing graphs
22	<ul style="list-style-type: none"> • Implementing binary search trees
23	<ul style="list-style-type: none"> • Implementing hash tables
24	<ul style="list-style-type: none"> • Dictionaries
25	<ul style="list-style-type: none"> • Vectors
26	<ul style="list-style-type: none"> • Graph traversal
27	<ul style="list-style-type: none"> • Tree traversal
28	<ul style="list-style-type: none"> • Reverse polish
29	<u>Paper 1 assessments this half-term:</u>
30	<ul style="list-style-type: none"> • Paper 1 assessment 2 - abstract data types
31	<u>Paper 2 topics for this half-term:</u>
32	<ul style="list-style-type: none"> • More on architecture and assembly language
33	<ul style="list-style-type: none"> • More on consequences of computing
34	<u>Paper 2 assessments this half-term:</u>
35	<ul style="list-style-type: none"> • Paper 2 assessment 3 - all topics covered this year
36	<ul style="list-style-type: none"> • Paper 2 assessment 4 - consequences of computing
37	Christmas & New Year Break
38	<u>Paper 1 topics for this half-term:</u>
39	<ul style="list-style-type: none"> • Work on skeleton program
40	<u>Paper 1 assessments this half-term:</u>
41	<ul style="list-style-type: none"> • Paper 1 assessment 3 - hand tracing with abstract data types

20	<ul style="list-style-type: none"> ● Paper 1 assessment 4 - section C questions
21	<u>Paper 2 topics for this half-term:</u>
22	<ul style="list-style-type: none"> ● Networking ● The Internet ● More on Databases
	<u>Paper 2 assessments this half-term:</u>
	Mid Term Break
23	<u>Paper 1 topics for this half-term:</u>
24	
25	<u>Paper 1 assessments this half-term:</u>
26	
27	<u>Paper 2 topics for this half-term:</u>
	<u>Paper 2 assessments this half-term:</u>
	Easter Break
28	<u>Paper 1 topics for this half-term:</u>
29	<ul style="list-style-type: none"> ● More complex data structures including hash tables and stacks ● Classification of algorithms
30	<u>Paper 1 assessments this half-term:</u>
31	<ul style="list-style-type: none"> ● Paper 1 assessment 5 - finite state machines ● Paper 1 assessment 6 - AS paper 1 mock section A only
32	
33	<u>Paper 2 topics for this half-term:</u>
	<ul style="list-style-type: none"> ● Revision of all topics covered so far
	<u>Paper 2 assessments this half-term:</u>
	<ul style="list-style-type: none"> ● Paper 2 assessment 5 - databases ● Paper 2 assessment 6 - AS paper 2 mock full paper
	Mid Term Break
34	<u>NEA</u>
35	<ul style="list-style-type: none"> ● Intro to Tkinter and sqlite3
36	<ul style="list-style-type: none"> ● Decide on a project
37	<ul style="list-style-type: none"> ● Complete Analysis section of NEA

Course Information

<u>Course Structure</u>	The course is assessed through two exams and coursework (NEA). Paper 1 is worth 40% Paper 2 is worth 40% NEA is worth 20% You will hand your coursework in before the Easter break in year 13. You will sit both papers at the end of year 13. Paper 1 is a programming paper that you will do using a computer. Paper 2 is a written paper.														
<u>Assessment</u>	You will be assessed at 6 points throughout the year for both papers. The assessments will be formed of past exam-style content and will be graded with A level grades. Each assessment will be mostly focussed on the topic you have been studying; however, some of the questions will be interleaved (questions from other topics) making it vital that you always revisit topics over and over again.														
<u>Feedback</u>	<ol style="list-style-type: none">1. You complete the assessment2. Your teacher will mark the work, giving you strengths that reinforce the positives in your work and targets that directly show you how to improve.3. Your work will be returned to you and you will fill in a STAR Reflection sheet to help you engage with the feedback and identify how you will improve for next time4. After reading the detailed feedback your teacher has provided you with, you will improve a part of your work using a purple pen.5. Your assessments will be placed into assessment folders for the subject														
<u>Assessment Objectives</u>	<table><tr><td></td><td><u>How do I demonstrate this in my work</u></td><td><u>Overall weighting</u></td></tr><tr><td><u>AO1</u></td><td>Demonstrate knowledge and understanding of the principle concepts of computer science, including abstraction, logic, algorithms and data representation. This is largely tested in paper 2 and a little in paper 1.</td><td>30%</td></tr><tr><td><u>AO2</u></td><td>Apply knowledge and understanding of the principles and concepts of computer science, including to analyse problems in computational terms. This is tested in both papers and a little in the NEA.</td><td>30%</td></tr><tr><td><u>AO3</u></td><td>Design, program and evaluate computer systems that solve problems, making reasoned judgements about these and presenting conclusions. This is tested largely in paper 1 and the NEA and a little in paper 2.</td><td>40%</td></tr></table>				<u>How do I demonstrate this in my work</u>	<u>Overall weighting</u>	<u>AO1</u>	Demonstrate knowledge and understanding of the principle concepts of computer science, including abstraction, logic, algorithms and data representation. This is largely tested in paper 2 and a little in paper 1.	30%	<u>AO2</u>	Apply knowledge and understanding of the principles and concepts of computer science, including to analyse problems in computational terms. This is tested in both papers and a little in the NEA.	30%	<u>AO3</u>	Design, program and evaluate computer systems that solve problems, making reasoned judgements about these and presenting conclusions. This is tested largely in paper 1 and the NEA and a little in paper 2.	40%
	<u>How do I demonstrate this in my work</u>	<u>Overall weighting</u>													
<u>AO1</u>	Demonstrate knowledge and understanding of the principle concepts of computer science, including abstraction, logic, algorithms and data representation. This is largely tested in paper 2 and a little in paper 1.	30%													
<u>AO2</u>	Apply knowledge and understanding of the principles and concepts of computer science, including to analyse problems in computational terms. This is tested in both papers and a little in the NEA.	30%													
<u>AO3</u>	Design, program and evaluate computer systems that solve problems, making reasoned judgements about these and presenting conclusions. This is tested largely in paper 1 and the NEA and a little in paper 2.	40%													
<u>Study Materials</u>	<ul style="list-style-type: none">• Knowledge Organisers• Course companions available through the college.• Google Classroom• Craig 'n' Dave YouTube channel• AQA specification, past papers and bank of exam questions• Resources written by the team														
<u>Class Work</u>	You will need to provide a ring binder to keep your notes in. You will be given dividers with lists of all the topics for each section of the course. Your folders will be checked regularly to make sure you are making good quality notes and that your work is well organised.
