What is a disability?

Here is the dictionary definition.

Dictionary

Search for a word

disability

/dɪsəˈbɪlɪti/

noun

1. a physical or mental condition that limits a person's movements, senses, or activities.
"children with severe physical disabilities"

Why a disabled person get the same rights as everyone else

A disabled person should get the same rights because they are just like anyone else and they deserve a chance to do whatever they want, just like everyone else. They should also be treated the same because in the Equality Act it states that they should be protected from discrimination at school and work.

About disabilities

Not all disabilities can be seen. For example there are some people who are in wheelchairs but there are also people who have disabilities such as: dyslexia, dyspraxia, autism and lots more. We can't always tell if they have a disability or not so it is even more important that they are treated just like everyone else.

What rights do they have?

- They are protected from discrimination
- Disability living allowance
- Employment and living allowance
- Disability equipment and transport

What can disabled people do?

Not all disabled people can play all sports such as: if they had a wheelchair. Although they can play wheelchair basketball and other sports that are in the paralympics.

What is the paralympics?

Does anyone know?

The paralympics

The paralympics is just like the olympics but for disabled people so they can get a chance to be a paralympics champion.

Who are some famous people who had disabilities?

Guess who these people are and what disability they have - you should recognise them!

Greta Thunberg

Asperger syndrome

Albert Einstein

Autism

Stephen Hawking

Amyotrophic lateral sclerosis
