

## Year One Science Progression Steps

Year 1	Developing	Expected Standard	Exceeding	Scientific Language
<ul> <li>Animals, including humans (Biology)</li> <li>Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.</li> <li>Identify and name a variety of common animals that are carnivores, herbivores and omnivores.</li> <li>Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets).</li> <li>Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.</li> </ul>	<ul> <li>Pupil can point to different parts of the body and suggest names</li> <li>Pupil knows that not all animals eat the same food types and that some eat only meat and other plants</li> <li>Pupil begins to identify that we have different senses</li> <li>Pupil can identify some similarities and differences in the animals they see around them and may loosely group them according to these features</li> <li>Pupil begins to identify that we have different senses</li> <li>Pupil begins to identify that we have different senses</li> <li>Pupil can identify some similarities and differences in the animals they see around them and may loosely group them according to these features</li> <li>Pupil can identify some similarities and differences in the animals they see around them and may loosely group them according to these features around them and may loosely group them according to these features</li> </ul>	<ul> <li>Pupil can identify and name the main parts of the human body and their functions</li> <li>Pupil can explain the difference between carnivores, herbivores and omnivores and give examples of animals in each group</li> <li>Pupil recognises that we have 5 different senses and explain which part of the body is associated with each</li> <li>Pupil recognises the different features/structure of common animals and can use these to group some animals they see around themselves</li> </ul>	<ul> <li>Pupil can name and identify the location of some internal features of the body as well as all external features</li> <li>Pupil begins to recognise that animals are consumers and part of a food chain for other animals</li> <li>Pupil can accurately name each sense and explain why we need these senses to keep us safe and alive.</li> <li>Pupil can accurately name the different features of each animal group and can name each group whilst explaining their differences</li> </ul>	animals; human; fish; reptile; amphibian; bird, mammal; vertebrate; invertebrate; carnivore; omnivore; herbivore; feathers; scales; fur; hair; touch; skin; taste; mouth, tongue; hear; sight; smell; nose; ear; eye; face; leg; foot; ankle; knee; toe; arm; hand; finger; thumb; head; neck; elbows; environment; habitat; pets; wild; sweet; salty; sour; bitter; rough; smooth; dry; wet; moist; hot; cold; icy; consumer; food chain.
Everyday Materials (Chemistry) Distinguish between an object and the material from which it is made. Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock. Describe the simple everyday physical properties of a variety of everyday materials. Compare and group together a variety of everyday materials on the basis of their simple physical properties	<ul> <li>Pupils understand that some materials are not natural</li> <li>Pupil can identify several materials and may be able to name objects made from these materials</li> <li>Pupil has a limited vocabulary to express the properties of materials</li> <li>Pupil is unable to say why a material is appropriate to use in making an object</li> </ul>	<ul> <li>Pupil can identify a range of natural and man-made materials from which objects are made Pupil is aware that objects are made from certain materials dependent on their properties</li> <li>Pupil can use a range of vocabulary to describe the properties of materials</li> <li>Pupil suggests different ways to investigate the properties of materials to test if they would be suitable for making an object</li> </ul>	<ul> <li>Pupil confidently groups objects made from materials with similar properties</li> <li>Pupil can give reasons for why objects are made from particular materials according to their properties</li> <li>Pupil has a wide-ranging vocabulary to accurately describe the properties of materials</li> <li>Pupil can suggest suitable materials to use when making a new object with a clearly defined purpose</li> </ul>	materials; properties; hard; soft; stretchy; elastic; stiff; shiny; dull; rough; smooth; bendy; not bendy; flexible; rigid; solid; liquid; waterproof; absorbent; not absorbent; transparent; opaque; brick; wood; plastic; metal; fabric; wool; foil; elastic; man made; natural; manufactured; object.

Year 1	Developing	Expected Standard	Exceeding	Scientific Language
Plants (Biology) Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. Identify and describe the basic structure of a variety of common flowering plants, including trees.	<ul> <li>Pupil can identify and name a limited number of plants usually requiring support</li> <li>Pupil can use some vocabulary accurately to name parts of a plant (may not be consistent across a range of plants)</li> <li>Pupil can recognise that some trees do/do not have leaves in winter</li> </ul>	<ul> <li>Pupil can identify and name accurately a range of plants</li> <li>Pupil can accurately and consistently name the main parts of a plant over a range of plants</li> <li>Pupil can name and use correct vocabulary to describe the features of some deciduous and evergreen trees</li> <li>Pupil can identify that some plants found in the wild are not grown in gardens and vice versa</li> </ul>	<ul> <li>Pupil begins to notice similarities and differences between the plants they identify</li> <li>Pupil can identify similarities in the structure of plants and begins to ask questions and seek answers to explain</li> <li>Pupil can suggest some reasons for the differences between deciduous and evergreen trees</li> <li>Pupil recognises some plants are cultivated in gardens and tries to explain why</li> </ul>	plant; leaf/ves; flower; blossom; petal; fruit; bud; root; bulb; seed; trunk; branches; stem; wild; garden; common; tree; deciduous; evergreen; earth; soil; dead; healthy; alive; living; grow(ing); Pupils create lists of common flowers/plants seen in/around the local area with photographs of the plants at different times of the year/stages in their life cycle e.g. dandelion; daisy; buttercup; bluebell; dock; clover; grass; nettles
Seasonal Change (Physics) Observe changes across the four seasons. Observe and describe weather associated with the seasons and how day length varies.	<ul> <li>Pupil knows that there are different seasons</li> <li>Pupil knows that it is warmer in summer and colder in winter</li> <li>Pupil can name some months associated with winter or summer</li> <li>Pupil begins to understand that there is more daylight in summer and less in winter</li> <li>Pupil understands that a weather map helps identify changes in the weather we may face</li> </ul>	<ul> <li>Pupil can describe the features of different seasons using correct vocabulary</li> <li>Pupil compares and contrasts the different seasons</li> <li>Pupil recognises which months are associated with different seasons</li> <li>Pupil can explain the different weather, light and temperature associated with each season</li> <li>Pupil records simple weather information on a chart or in a diary and explains the changes they observe</li> </ul>	<ul> <li>Pupil describes and explains how the different seasons affect plants, animals and humans</li> <li>Pupil can talk about the seasons in the UK and is beginning to compare/contrast with seasons in different parts of the world.</li> <li>Pupil can discuss features of the weather during each month and how it impacts upon their activities</li> <li>Pupil begins to link the temperature to the amount of daylight and discuss how this affects the weather</li> <li>Pupil uses information about the seasons and daily weather patterns they know to predict changes/expected conditions</li> </ul>	autumn; winter; spring; summer; seasons; sun; light; day; night; rain; sleet; snow; blizzard; freezing; frost; ice; rain; mist; fog; wind; temperature; hot; cold; cool; weather; forecast; clouds; thunder; lightning; environment; air;
