Careers Guidance	<p>In recent years higher education institutions and employers have flagged the need for students to develop a range of transferable skills to enable them to respond with confidence to the demands of undergraduate study and the world of work. Drama allows students to develop skills for life and, although students may not want to pursue a career within the performing arts, the skills they will develop in the drama classroom will be priceless in any career they pursue. Students will find themselves to be confident speakers, able to work with many different people in varying group sizes, be aware of how to present themselves in job interviews, presentations or auditions, be able to analyse and evaluate, and have a rich understanding of how to interact and communicate with others. Studying Drama and Theatre is useful for students considering higher education in any arts or humanities subject including English Language and Literature, Journalism, Dance, Music, Art and Design, and Media Studies. Career opportunities for students who study Drama and Theatre include: arts/theatre administration, teaching, arts journalism, directing, acting, designing, stage-management, theatre-management, technician, broadcasting, media presenting, drama therapy and scriptwriting.</p>
