

Input & Output Devices

Label the Drawing

We use a variety of different input and output devices in our daily lives. The drawing below identifies a range of these. Annotate the drawing to identify each of the different devices.

Complete the Table

Input devices are used to enter data and commands into a computer system and output devices are used to receive data from a computer system. Below is a list of example devices. Identify if they're input or output.

Device	Input	Output
Microphone		
Projector		
Sensor		
Plotter		
Actuator
