

SUCCESS CRITERIA

Additional Research– Have you....

Added an introduction and summary to each piece of research You have considered what you need to do next.	Completed at least one additional product analysis of a relevant product.	Researched materials you will use including advantages, disadvantages and availability (this could be a fold out of the processes page)	Completed research into a designer that could inspire the function or aesthetics of your product.
	For each piece of information researched you have explained how this information can further develop your design.	Gained client feedback' - you have then considered how this information can further develop your design.	Consider any specification points that this research has ensured you will meet.

For the product you have created a model of, complete the following pages:

- Product Analysis (of a similar product that could help develop your design)
- Material Research (of materials that could be used to manufacture your prototype e.g:
 - Laser plywood
 - Acrylic
 - Mylar
 - Pine
 - Polypropylene
 - Dowel)
- Designer Research (of a designer whose style you think is suitable for your client and that could help develop your design)
