

Creating a Web Banner

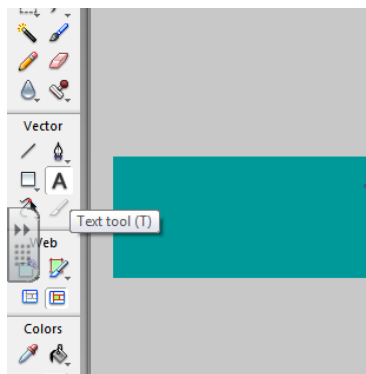

Sensible Width and Height
Don't need to change the Resolution

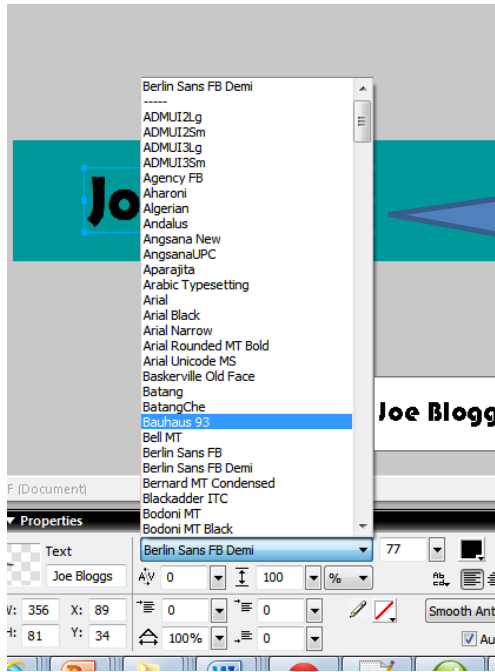

Banner the right size now

Edit background colour – remember your colour scheme!

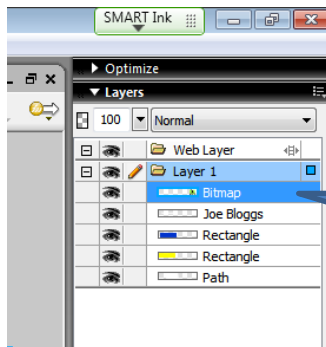

From 'Vector' tools select the text tool

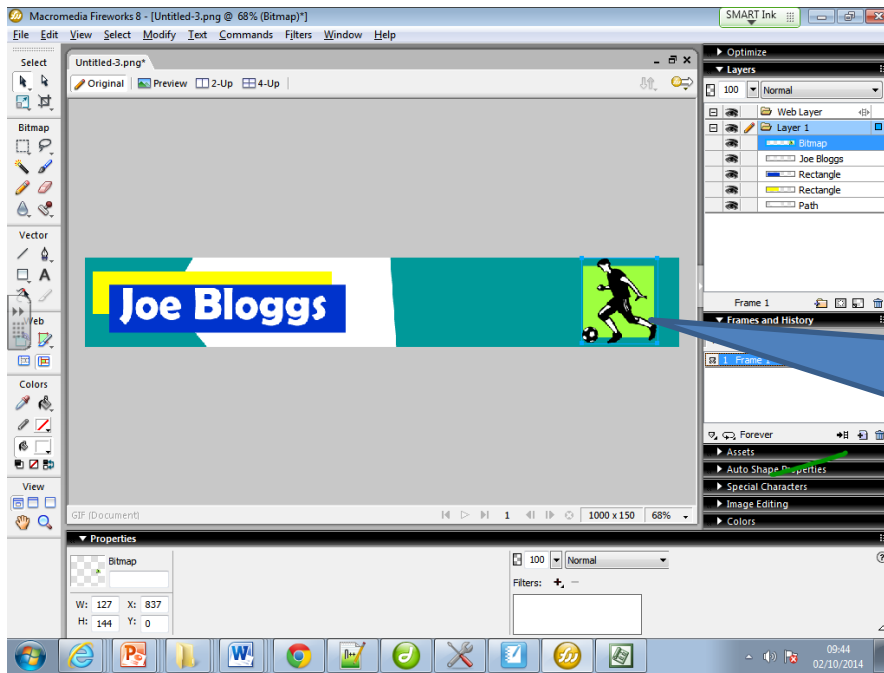

Type your text and change the font, size and colour

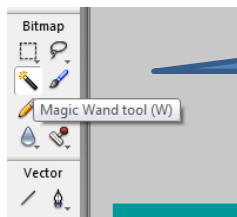

Add some interesting shapes

You can move object to the front or back by dragging them to the right place in the layers
This is a Stack – so objects at the bottom are to the back

You could add an image
e.g. get a clipart from
Word and copy it in
Tip: don't use photos

If you want to remove part of the
image use the Magic Wand Tool

Magic Wand Tool used to remove
background colour on image
