Success Criteria

Tick the boxes which you have successfully achieved:

I have drawn construction lines very lightly so they can be removed.

I ensured that the starting rectangle for the front elevation was pushed into the top right hand corner.

I have used the dimensions on the 3D object to accurately draw each elevation.

I have used a ruler to draw all lines accurately.

I can use the projection method to construct the side and plan views.

I have used a fine liner accurately to define the projections.
