

Optional Experiments

Free apps can be a brilliant way to play around with your photographs as use the finished pieces as experiments in your books.

It can also be useful to edit an image to make it into a painting on an app, before we attempt the painting by hand. It makes it easier to imagine where the brush strokes will go or helps you apply the correct colours.

FREE APPS THAT COULD HELP:

VINCI

Photo mirror

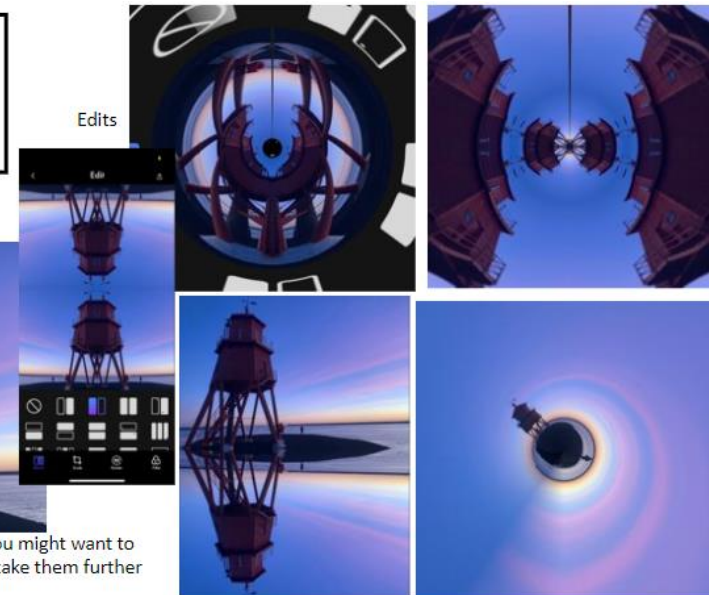

Tiny Planets.

PIXlr (general editing)

Photopea (general editing)

TASK TWO – Choose one photo and use free apps/websites to facilitate mirroring and distortion. I used Photo mirror and Tiny Planets. There are lots more out there and PIXlr and photopea, com are good for general editing. Create 10 edits

Original

Once you have completed some edits you might want to keep putting them through the apps to take them further and further

1. Take a photo of some of your existing work and edit it using free apps, filters and drawing tools.
2. Create 6 digital outcomes to present in your sketchbook.
3. When confident try doing your own digital artwork without using an image underneath. Also present this in your sketchbook.
4. Annotate your work.

Digital drawing/editing apps:

- Tayasui sketches
- Glitchlab
- Mirrorlab
- Hypocam
- Instasquare
- Photoshop express
- Hipstamatic
- Pixlr
- Snapseed
- Fragment
- Kaleidacam
- Prisma
- Instagram Layout
- PhotoPea - www.photopea.com
- Pixlr
- VSCOcam
- Tiny Worlds (99P)
- Autodesk sketchbook
- Snap seed
- FXStencil
- Vinci
- Prisma
