

Enrichment Activities

Our comprehensive enrichment programme enables students to develop their gifts and talents beyond the classroom through a wide range of workshops, seminars and subject taster sessions throughout the academic year. We have strong partnerships with universities, colleges and other educational providers, giving students access to a variety of courses, experiences and opportunities that help them to explore potential future pathways.

Our Subject Taster Programme allows students to gain a real insight into what studying different degrees and further qualifications would be like, while our UniReady and Pathway to University Programmes provide tailored support to help them prepare for higher education.

Alongside this, our regular enrichment workshops, which take place weekly within the school calendar, equip students with the skills, confidence and knowledge they need to succeed in the modern world. The programme also encourages students to reflect on their experiences and recognise how these opportunities contribute to their personal growth and future aspirations.

St Mary's Sixth Form

Shining together in faith, joy and love
