

# Extra-Curricular Clubs

As well as ensuring our students are supported through excellent teaching in lessons, our Sixth Formers are offered a wide range of additional opportunities designed specifically for them. These include our comprehensive Aspire to Oxbridge programme, which supports students in preparing high-quality applications to Oxford, Cambridge and other Russell Group universities.

We also run a dedicated Medicine and Dentistry Society, giving aspiring medics and dentists a realistic understanding of these careers, support in finding and reflecting on relevant experience, and tailored guidance on every stage of the competitive application process.

Alongside this, students can take part in a range of other Sixth Form activities, such as the Law Society, where they explore legal issues and career routes; the Sixth Form Newspaper and Podcast, which develop communication, creativity and teamwork; the Debate Club, which builds confidence in public speaking and critical thinking; and STEM Club, which allows students to extend their scientific interests beyond the curriculum through projects, competitions and collaborative work.

## St Mary's Sixth Form
