

Pathway to University

Our Pathway to University Programme is a central part of the enrichment offer at St Mary's Sixth Form, supporting students to make confident and well-informed decisions about higher education.

Through our strong partnerships with a wide range of universities, including Durham University, Newcastle University, Northumbria University, the University of Manchester, the University of Leeds, King's College London, the University of Oxford and the University of Cambridge, students benefit from access to specialist support and transition programmes, as well as regular enrichment workshops led by university staff.

Each year, the Sixth Form organises visits to local university campuses and residential trips to universities further afield, giving students a first-hand experience of university life and study. Alongside this, we provide a comprehensive programme of guidance on course choices, personal statements, interviews and student finance, ensuring that every student is supported to make a successful and aspirational application to university.

St Mary's Sixth Form

Shining together in faith, joy and love
