

# Super-Curricular

St Mary's Sixth Form encourages every student to develop an active super-curriculum throughout Year 12 and Year 13. Our directed Super-Curriculum brings together all the activities that help students stretch themselves beyond the classroom and exam specifications, fostering academic curiosity, independence and confidence.

The St Mary's Sixth Form Super-Curriculum is designed to deepen understanding, spark enthusiasm and nurture a genuine love of learning. Through this programme, students broaden their knowledge of the subjects they study and explore the wider issues and questions that surround them. This work also supports strong applications for university, apprenticeships and employment by providing rich material for personal statements and interviews, and by helping students to speak confidently about their interests and experiences.

Super-Curricular activities include completing virtual work experience and insight programmes, reading books from our dedicated Sixth Form Library, and taking part in online learning courses, lectures and academic events.
