DID YOU KNOW?

Applying mathematics takes 'friendship paradox' beyond averages

The friendship paradox is the observation that the degrees of the neighbors of a node within any network will, on average, be greater than the degree of the node itself. In other words: your friends probably have more friends than you do.

KEEP CALM AND LOVE MATH

Careers in Maths — Data analyst

Data analysts are in high demand across all sectors, such as finance, consulting, manufacturing, pharmaceuticals, government and education. The ability to pay attention to detail, communicate well and be highly organised are essential skills for data analysts. They not only need to understand the data, but be able to provide insight and analysis through clear visual, written and verbal communication.

Calculate

A calculator and some working will be needed.

KEEP CALM AND KNOW YOUR COMMAND WORDS

Maths Star of the Week KS3

7t - Maria B
7r - Liam W
7v - Ella P

8s - Tyler J
8t - *Ashleigh*
8r - Alfie H

8e - Ruby
9s - Samuel
9t - *Ella*
9r -Maddie

9v- Kai

Maths Star of the Week KS4&5

10S- *Kaitlin*
10T- Callum
10I- Janina
10V-Maria

How many steps are required to break an m × n sized bar of chocolate into 1 × 1 pieces?

You can break an existing piece of chocolate horizontally or vertically.

You cannot break two or more pieces at once (so no cutting through stacks).
