The calculations behind filling supermarket shelves are dizzyingly complex – but it all starts with the x and y you know from school

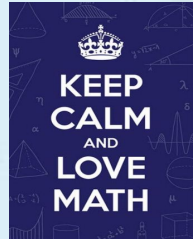

Investment analyst

An investment analyst provides research and information to help traders, fund managers and stockbrokers make decisions about investments. The information you provide ensures investment portfolios are well managed and that potential investment opportunities are highlighted.

Factorising is the reverse process of expanding brackets. A factorised answer will always contain a set of brackets. To factorise an expression fully, take out the highest common factor (HCF) of all the terms.
