### LOOK AT MY DAB!

In our school, there is an annoying craze ... it is called ... dabbing!

This is a dance move that most school children use. This move consists of having the back of one of your hands on your forehead and the other arm extended out in the same direction. (See image below.)

It is annoying because everyone does it for everything! If they get an answer right ... they dab. If someone says their name ... they dab. If someone breathes ... they dab!

It started when a viral video on YouTube which got passed down to other social sights of a basketball player from the NBA dabbled when he did a slam dunk and now football player called Pogba who did it for a celebration when he scored a goal. And now there is a song about dabbing called look at my dab.

It is a mystery why this move has become so popular. Whilst some think it is funny, I'm sure teachers find it annoying... DAB!

### FLIPPING, FLIPPING BOTTLE FLIPPING!

Also, our school has another annoying craze ... called bottle flipping.!

Bottle flipping is when you flip a bottle and try to land it flat. (See instructions below.)

Our school is trying to ban this annoying but addictive trend, because when the teachers are trying to teach, students bottle flip.

This trend was started when a teenager at his school talent show flipped a bottle; he landed it straight away and the crowd went crazy!

Also, Bottle flipping has become a famous trend because a famous group of YouTubers called 'Dude Perfect' did it and they have over 15 million subscribers.

Their bottle flipping video got over 50 million views!

This annoying trend will continue to irritate because ... a successful bottle flip is always followed by (yes, you've guessed it) ... a DAB!

### "ARE YOU CHEWING"

The last Cardinal Wiseman annoying addiction is that ... everyone chews chewing gum.

It happens every single day in every single class in every single school in every single country on every single planet in every single galaxy ... where there are school children.

When students get caught in class, they pretend to put it in the bin. But really, they don't (but don't tell the teachers that) or, if they do, they just pop another one back into their mouth when they get back to their seat.

The very worst thing about chewing gum is that when the gum loses its fantastic flavour, some horrible people decided to dispose of the gum UNDER THE TABLE! This disgusting habit is annoying for the caretaker and shows a complete lack of respect for school property.

Even though, it may be fun to blow bubbles, gum needs to go!
