

## COVID-19 Risk assessment – Opening schools

**The Government has asked school leaders to take to reduce the risk of transmission of coronavirus (COVID-19) in their school. This includes public health advice, endorsed by Public Health England (PHE).**

The Guidance is intended to support schools, both mainstream and alternative provision, to prepare reduce the risk of transmission of coronavirus (COVID-19) and applies to primary, secondary (including sixth forms), infant, junior, middle, upper, school-based nurseries and boarding schools. The DfE expects independent schools to follow the control measures set out in this document in the same way as state-funded schools. The Guidance also covers expectations for children with special educational needs and disabilities (SEND), including those with education, health and care plans, in mainstream schools.

**All changes to the template are in blue.**

The link to reviewed Guidance: <https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak>. Separate Guidance is available, as follows:

- Early Years: <https://www.gov.uk/government/publications/coronavirus-COVID-19-early-years-and-childcare-closures>
- Further education colleges and providers: <https://www.gov.uk/government/publications/coronavirus-COVID-19-maintaining-further-education-provision>
- SEN schools & alternative provision: <https://www.gov.uk/government/publications/guidance-for-full-opening-special-schools-and-other-specialist-settings>

**The overall government guidance says the following:**

The government continues to manage the risk of serious illness from the spread of the virus. Step 4 marked a new phase in the government's response to the pandemic, moving away from stringent restrictions on everyone's day-to-day lives, towards advising people on how to protect themselves and others, alongside targeted interventions to reduce risk. As COVID-19 becomes a virus that we learn to live with, there is now an imperative to reduce the disruption to children and young people's education - particularly given that the direct clinical risks to children are extremely low, and every adult has been offered a first vaccine and the opportunity for 2 doses by mid-September.

Our priority is for you to deliver face-to-face, high-quality education to all pupils. The evidence is clear that being out of education causes significant harm to educational attainment, life chances, mental and physical health. We have worked closely with the Department of Health and Social Care (DHSC) and Public Health England (PHE) to revise this guidance.

Some specific issues are addressed in the risk assessment, but please read the full Government advice to schools for clarity. Risk assessment templates are also available for Mass Asymptomatic Testing, Wraparound provisions and Partial opening with Critical Worker & Vulnerable Pupils.

Additional PPE for coronavirus (COVID-19) is only required in a very limited number of scenarios, for example, when:

- a pupil becomes ill with coronavirus (COVID-19) symptoms, and only then if a 2-metre distance cannot be maintained
- performing aerosol-generating procedures (AGPs) – Guidance is provided at <https://www.gov.uk/government/publications/safe-working-in-education-childcare-and-childrens-social-care/safe-working-in-education-childcare-and-childrens-social-care-settings-including-the-use-of-personal-protective-equipment-ppe#aerosol-generating-procedures-agps>

If contact with the child or young person is necessary, gloves, an apron and a face covering should be worn by the supervising adult. In addition, if a risk assessment determines that there is a risk of splashing to the eyes, for example, from coughing, spitting, or vomiting, then eye protection should also be worn.

PPE must be worn by staff caring for the child while they await collection if a distance of 2 metres cannot be maintained (such as a very young child or a child with complex needs). More information on PPE use can be found <https://www.gov.uk/government/publications/safe-working-in-education-childcare-and-childrens-social-care/safe-working-in-education-childcare-and-childrens-social-care-settings-including-the-use-of-personal-protective-equipment-ppe>

#### **Risk assessment (Government guidance requirements):**

You must comply with health and safety law and put in place proportionate control measures. You must regularly review and update your risk assessments – treating them as ‘living documents’, as the circumstances in your school and the public health advice change. This includes having active arrangements in place to monitor whether the controls are effective and working as planned.

#### **Your September 2021 operational risk assessment should include:**

##### **Control measures**

1. Ensure good hygiene for everyone.
2. Maintain appropriate cleaning regimes.
3. Keep occupied spaces well ventilated.
4. Follow public health advice on testing, self-isolation and managing confirmed cases of COVID-19.

##### **Social Distancing and ‘bubbles’ – Government operational guidance:**

It is no longer necessary to keep children in consistent groups (‘bubbles’). As well as enabling flexibility in curriculum delivery, this means that assemblies can resume, and you no longer need to make alternative arrangements to avoid mixing at lunch.

You should make sure your [contingency](#)/outbreak management plans cover the possibility that in some local areas, it may become necessary to reintroduce ‘bubbles’ for a temporary period to reduce mixing between groups.

##### **Clinically extremely vulnerable (CEV) students**

All clinically extremely vulnerable (CEV) children and young people should attend their education setting unless they are one of the very small number of children and young people under paediatric or other specialist care who have been advised by their clinician or other specialist not to attend.

#### **Engage with the NHS Test and Trace process:**

As with positive cases in any other setting, NHS Test and Trace will work with the positive case and/or their parent to identify close contacts. Contacts from a school setting will only be traced by NHS Test and Trace where the positive case and/or their parent specifically identifies the individual as being a close contact. This is likely to be a small number of individuals who would be most at risk of contracting COVID-19 due to the nature of the close contact. You may be contacted in exceptional cases to help with identifying close contacts, as currently happens in managing other infectious diseases.

Individuals are not required to self-isolate if they live in the same household as someone with COVID-19, or are a close contact of someone with COVID-19, and any of the following apply:

- they are fully vaccinated
- they are below the age of 18 years and 6 months
- they have taken part in or are currently part of an approved COVID-19 vaccine trial
- they are not able to get vaccinated for medical reasons

Instead, they will be contacted by NHS Test and Trace, informed they have been in close contact with a positive case and advised to take a PCR test. Please encourage all individuals to take a PCR test if advised to do so.

Staff who do not need to isolate, and children and young people aged under 18 years 6 months who usually attend school, and have been identified as a close contact, should continue to attend school as normal. They do not need to wear a face covering within the school, but it is expected and recommended that these are worn when travelling on public or dedicated transport.

18-year-olds will be treated in the same way as children until 6 months after their 18<sup>th</sup> birthday to allow them the opportunity to get fully vaccinated. At which point, they will be subject to the same rules as adults, and so if they choose not to get vaccinated, they will need to self-isolate if identified as close contact.

Settings will continue to have a role in working with health protection teams in the case of a local outbreak. If there is an outbreak in a setting or if the central Government offers the area an enhanced response package, a director of public health might advise a setting to reintroduce some control measures temporarily.

#### **Face coverings**

Face coverings are no longer advised for pupils, staff and visitors either in classrooms or in communal areas. The government has removed the requirement to wear face coverings in law but expects and recommends that they are worn in enclosed and crowded spaces where you may come into contact with people you don't normally meet. This includes public transport and dedicated transport to school or college.

### **In circumstances where face coverings are recommended**

If you have a substantial increase in the number of positive cases in your school, a director of public health might advise you that face coverings should temporarily be worn in communal areas or classrooms (by students, staff and visitors, unless exempt). You should make sure your [contingency plans](#) cover this possibility.

In these circumstances, transparent face coverings, which may assist communication with someone who relies on lip reading, clear sound or facial expression to communicate, can also be worn.

Face visors or shields can be worn by those exempt from wearing a face covering but they are not an equivalent alternative in terms of source control of virus transmission. They may protect the wearer against droplet spread in specific circumstances but are unlikely to be effective in preventing the escape of smaller respiratory particles when used without an additional face covering. They should only be used after carrying out a risk assessment for the specific situation and should always be cleaned appropriately.

### **Stepping measures up and down**

You should have contingency plans (sometimes called outbreak management plans) outlining what you would do if children, pupils, students or staff test positive for COVID-19, or how you would operate if you were advised to take extra measures to help break chains of transmission. Given the detrimental impact that restrictions on education can have on children and young people, any measures in schools should only ever be considered as a last resort, kept to the minimum number of schools or groups possible, and for the shortest amount of time possible.

Central government, Local Authorities, and the DfE may offer local areas of particular concern an enhanced response package to help limit increases in transmission.

### **Outbreak management plan**

For most settings it will make sense to think about taking extra action if the number of positive cases substantially increases. Information on what circumstances might lead you to consider taking additional action, and the steps you should work through, can be found in the contingency framework: <https://www.gov.uk/government/publications/coronavirus-covid-19-local-restrictions-in-education-and-childcare-settings>

The contingency framework describes the principles of managing local outbreaks of COVID-19 in education and childcare settings. Local authorities, directors of public health and PHE health protection teams (HPTs) can recommend measures described in the contingency framework in individual education and childcare settings – or a small cluster of settings – as part of their outbreak management responsibilities.

### **Travel and quarantine**

Where pupils travel from abroad to attend a boarding school, you will need to explain the rules to pupils and their parents before they travel to the UK. All pupils travelling to England must adhere to travel legislation (<https://www.legislation.gov.uk/ukxi/2021/582/contents>), details of which are set out in government travel advice (<https://www.gov.uk/guidance/red-amber-and-green-list-rules-for-entering-england>).

Boarding school pupils who are ordinarily resident in the UK, including those who are unaccompanied and who are attending boarding schools on a child student visa or student visa, who have travelled from or through amber list countries (and have not been in a red country in the previous 10 clear days), are exempt from the requirements to quarantine and take a day 8 test.

Those aged 11 to 17 need proof of a negative COVID-19 test (<https://www.gov.uk/guidance/coronavirus-COVID-19-testing-for-people-travelling-to-england>) to travel to England (children aged 10 and under are exempt from this) and those aged 5 to 17 must take a COVID-19 travel test on or before day 2. More information is provided in the government's quarantine and testing guidance (<https://www.gov.uk/guidance/how-to-quarantine-when-you-arrive-in-england>).

### **Asymptomatic testing**

Secondary school settings may commence testing from 3 working days before the start of term and can stagger return of pupils across the first week to manage this. Pupils should then continue to test twice weekly at home until the end of September, when this will be reviewed.

Staff should undertake twice weekly home tests whenever they are on site until the end of September, when this will also be reviewed.

Secondary schools should also retain a small asymptomatic testing site (ATS) on-site until further notice so they can offer testing to pupils who are unable to test themselves at home.

### **Confirmatory PCR tests**

Staff and pupils with a positive LFD test result should self-isolate in line with the [stay at home guidance for households with possible or confirmed coronavirus \(COVID-19\) infection](#). They will also need to [get a free PCR test to check if they have COVID-19](#). Whilst awaiting the PCR result, the individual should continue self-isolating. If the PCR test is taken within 2 days of the positive lateral flow test, and is negative, it overrides the self-test LFD test and the pupil can return to school, as long as the individual doesn't have COVID-19 symptoms.

### **Consulting and sharing Coronavirus (COVID-19) risk assessment**

Schools should consult with the health and safety representative selected by a recognised trade union or, if there isn't one, a representative chosen by staff. Schools and staff should always come together to resolve issues. Schools should share the results of their risk assessment with their workforce. If possible, they should consider publishing it on their website to provide transparency of approach to parents, carers and pupils (The HSE would expect all employers with over 50 staff to do so).

For further information regarding this assessment, please refer to your assigned Judicium Education Health & Safety consultant.

***By signing this risk assessment, I confirm the assessment has been shared / made available to all relevant staff to review. All staff have been asked to confirm they have read and understood the control measures.***

## Appendix – Assess the Level of Risk

In this risk assessment the level of risk is expressed qualitatively as **Low, Medium, High or Very High**. Underlying these descriptors of risk is a probabilistic model which factors the **likelihood** of an accident or event against the **severity** of harm that may occur. The **risk rating**, calculated as **likelihood x severity**, maps into the qualitative terms used as follows:

		Severity			
		Minor Injury	Reportable Injury	Serious Injury	Critical
Likelihood	Unlikely	Low	Low	Low	Medium
	Possible	Low	Medium	High	High
	Probable	Medium	High	High	Very High

**Reportable Injury** is an important threshold and refers to UK legislation in this respect, often referred to as **RIDDOR**. A reportable injury or occurrence includes:

- major injuries as defined in RIDDOR,
- accidents that resulted in more than 7 days off work,
- an injury to a member of the public, a customer or visitor, or a school pupil or student, that required hospital treatment.

(See <https://www.hse.gov.uk/pubns/edis1.pdf> for more information on RIDDOR).
