

Science Department Curriculum KS3

Vision & Intent

The Science Curriculum Area, in line with Eastlea Community School's core values, is committed to ensuring that all our students make greater than expected progress across all Key Stages in the subject of Science. Our Science curriculum has been designed to be rigorous, fun as well as challenging with the aim of developing students who are skilled critical thinkers, problem solvers, innovators and team players, as these are sought after desirable and transferable skills which would empower our students to excel beyond Eastlea.

Teaching and Learning at Key Stage 3

At Eastlea Community School, we follow the key stage 3 National Curriculum (year 7 – 9), which equips our students with the knowledge, skills and attributes to become confident and proficient life-long learners. Not only does our curriculum provide a solid foundation for progression to Key Stage 4, it also offers our students a wide range of opportunities to develop a real love for Science. The Science curriculum fosters a healthy curiosity in children, about our universe and promotes care and respect for our environment. We believe Science encompasses the acquisition of knowledge, concepts, skills and positive attitudes. Throughout the programmes of study, the children will acquire and develop the key knowledge that has been identified within each unit and across each year group, as well as the application of scientific skills. Our curriculum also actively promotes the spiritual, moral, social and cultural development of our students.

Year 7

Science	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Topic/Focus	Transition Forces- speed and gravity	Matter -Particle Model Separating Mixtures Organisms- Cells & Movement	Genes - Variation and Human reproduction Energy- Energy Costs and Energy Transfer	Earth - Earth Structure The Universe	Reactions- Acids & Alkalis Metals & Non-metals Ecosystems - Interdependence and Plant Reproduction	Waves -Sound & Light Electricity- Potential difference and Resistance. -Current

Resources	Introduction to science workbook. Sustainability project Activate 1 textbook, practical equipment. https://www.kerboodle.com	Activate 1 textbook, practical equipment, https://www.kerboodle.com	Activate 1 textbook, practical equipment, https://www.kerboodle.com	Activate 1 textbook, practical equipment, https://www.kerboodle.com	Activate 1 textbook, practical equipment, https://www.kerboodle.com	Activate 1 textbook, practical equipment, https://www.kerboodle.com
Assessment	End of topic tests Exam question practise Extended writing End of Autumn 1 Assessment (19th October 2020)	End of topic tests Exam question practise Extended writing End of Autumn 2 Assessment (07th December 2020)	End of topic tests Exam question practise Extended writing End of Spring 1 Assessment (08th February 2020)	End of topic tests Exam question practise Extended writing End of Spring 2 Assessment (22nd March 2020)	End of topic tests Exam question practise Extended writing End of Summer 1 Assessment (17th May 2020)	End of topic tests Exam question practise Extended writing End of Summer 2 Assessment (28th May 2020)

Extended Learning Opportunities	Survival Island project Stem club (after school enrichment program). Science Quiz Club (TBC)	Centre of the cell visit	Visit the Who am I? exhibit at the Science Museum	Space Challenge: Mission to Mars https://drive.google.com/drive/folders/19zsGF6XFisPwWUueWXRWHxdxR4Lwaur	Floating Garden Project ● Visit Whipsnade zoo or London zoo	https://drive.google.com/drive/folders/19zsGF6XFisPwWUueWXRWHxdxR4Lwaur
Working Scientifically: (CONCEPTS)	Investigate variables on the speed of a toy car rolling down a slope Explain the way in which an astronaut's weight varies on a journey to the moon	Use models to investigate the relationship between the properties of a material and the arrangement of its particles Devise ways to separate mixtures, based on their properties Identify the principal features	Graph data relating to variation and explain how it may lead to the survival of a species Relate advice to pregnant women to ideas about transfer of substances to the embryo	Model the processes that are responsible for rock formation and link these to the rock features Relate observations of changing day length to an appropriate model of the solar system	Devise an enquiry to compare how well indigestion remedies work Use experimental results to suggest an order of reactivity of various Metals Use a model to investigate the impact of changes in a population of one organism on	Relate changes in the shape of an oscilloscope trace to changes in pitch and volume Use ray diagrams to model how light passes through lenses and transparent materials Compare the voltage drop across resistors

		<p>of a cheek cell and describe their functions</p> <p>Explore how the skeletal system and muscular system in a chicken wing work together to cause movement</p>	<p>Explain the energy transfers in a hand-crank torch</p> <p>Compare the running costs of fluorescent and filament light bulbs</p>		<p>others in the ecosystem</p> <p>Use models to evaluate the features of various types of seed dispersal</p>	<p>connected in series in a circuit</p> <p>Compare and explain current flow in different parts of a parallel circuit</p>
--	--	--	--	--	--	--

Year 8

Science	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Topic/Focus	Organisms-Breathing & Digestion Matter- Elements & Periodic Table	Forces - Contact Force & Pressure Ecosystem- Respiration & Photosynthesis	Reactions - Types of Reaction & Chemical Energy Waves- Wave Effects & Wave Properties	Earth- Climate & Earth Resources	Electromagnets Magnetism & Electromagnets	Genes Evolution & Inheritance Energy- Work and Heating & Cooling
Resources	Activate 2 textbook, practical equipment https://www.kerboodle.com	Activate 2 textbook, practical equipment, https://www.kerboodle.com	Activate 2 textbook, practical equipment, https://www.kerboodle.com	Activate 2 textbook, practical equipment, https://www.kerboodle.com	Activate 2 textbook, practical equipment, https://www.kerboodle.com	Activate 2 textbook, practical equipment, https://www.kerboodle.com
Assessment	End of topic tests Exam question practise Extended writing End of Autumn 1 Assessment	End of topic tests Exam question practise Extended writing End of Autumn 2 Assessment	End of topic tests Exam question practise Extended writing End of Spring 1 Assessment	End of topic tests Exam question practise Extended writing End of Spring 2 Assessment	End of topic tests Exam question practise Extended writing End of Summer 1 Assessment	End of topic tests Exam question practise Extended writing

	(19th October 2020)	(07th December 2020)	ssment (08th February 2020)	ssment (22nd March 2020)	ssment (17th May 2020)	End of Summer 2 Assessment (28th May 2020)
Extended Learning Opportunities	STEM club, trips, Science week. Science Quiz Club (TBC)	STEM club, trips, Science week Plant Nutrition Project https://drive.google.com/drive/folders/19zsGF6XFifsPwWUUeWXRWHxdxR4Lwaur	TEM club, · Visit the Atmosphere gallery at the Science Museum	The Water Project Floating Garden Project Science Week		STEM club, trips, Science week Evolution Group Video Project. · Visit the Who am I? exhibit at the Science Museum
Working Scientifically: (CONCEPTS)	Investigate a claim linking height to lung volume Evaluate how well a model represents key features of the digestive system Compare the properties of elements with the	Investigate factors that affect the size of frictional or drag forces Investigate how pressure from your foot onto the ground varies with different footwear	Investigate changes in mass for chemical and physical processes Investigate a phenomenon that relies on an exothermic or endothermic reaction	Investigate the contribution that natural and human chemical processes make to our carbon dioxide emissions Predict the method used for extracting a metal based on its	Explore the magnetic field pattern around different types or combinations of magnets Investigate ways of varying the strength of an electromagnet	Review the evidence for theories about how a particular species went extinct Model the inheritance of a specific trait and explore the variation in the offspring produced

	<p>properties of a compound formed from them</p> <p>Sort elements using chemical data and relate this to their position in the periodic table</p>	<p>Use data from investigating fermentation with yeast to explore respiration</p> <p>Use lab tests on variegated leaves to show that chlorophyll is essential for photosynthesis</p>	<p>Relate the impact of different types of wave on living cells to their frequency and the energy carried by the wave and their uses</p> <p>Use the wave model to explain observations of the reflection, absorption and transmission of waves</p>	<p>position in the reactivity series</p>		<p>Explain how an electric motor raising a weight is doing work</p> <p>Investigate how to prevent heat loss by conduction, convection and radiation</p>
