

Science Year 6

Week commencing 23rd March 2020

- Firstly the field guide gives guidance on how to complete the task. Read through the pages to ensure you understand the task. The research could take place in your back garden .
- Local species worksheet can be completed to list plants and animals found in the garden. There is a plant ID sheet and an animal ID sheet which can be used to help or you can look on some websites to identify more unusual varieties.
- Then produce a field guide of different plants and animals you may find or research some and add them to your guide.
- Wordsearch to complete.
