

| Strengthening and Embedding Knowledge: | |
|---|---|
| Interleaving | Interleaving is essential to embed the three pillars of progression (phonics, vocabulary and grammar) that are taught. Students have access to an online platform where revisiting vocabulary is made fun. During lessons, Do Now activities are linked to previous knowledge such as what has been taught, last week, last month or last year. |
| Avocados, Bratwurst and Croissant | Students are encouraged to use the Avocados, Bratwurst and Croissant resources so their work is detailed and of high quality. |
| Outstanding Examples | WAGOLL (what a good or outstanding one looks like). Especially in writing tasks, the teachers will show students what an outstanding final product will look like. Success criteria will be given so students know exactly what to do. |
| Challenge and Differentiation | In all lessons, teachers are differentiating the work. There will also be challenge and aspire tasks to encourage students to extend their learning by working independently to extend and enhance the quality of their work. |
