

What should I already know?

- How to read, write, order and compare numbers to 10,000
- How to read Roman numerals to a 1000
- How to round any number to the nearest 10, 100 and 1000 up to 10,000
- How to read and write numbers to 100,000
- How to compare and order numbers to 100,000
- How to round numbers to the nearest 10, 100, 1000 and 10,000 up to 100,000
- How to read write and represent numbers up to 1,000,000
- How to count forwards and backwards in 10s, 100s, 1000s, 10,000s, and 100,000s
- How to compare and order numbers up to 1,000,000 using the correct vocabulary and symbols
- How to round numbers to the nearest 10, 100, 1000, 10000, 100,000 up to 1,000,000

What will I know by the end of the unit?

- How to read write and represent numbers to ten million in different ways
- How to write a number up to ten million putting the comma's in the correct places
- How to compare and order whole numbers up to ten million
- How to use the correct mathematical vocabulary alongside inequality symbols
- How to round numbers up to ten million to the nearest 10, 100, 1000, 10,000, 100,000, 1,000,000
- How to use pictures and number lines to work with negative numbers to find intervals across zero

Vocabulary

ten million	10,000,000 (10 x10 x10x10x10x10x10)	less than	not as many as.
millions	1,000,000 (10x10x10x10x10)	order	arrangement according to size, amount or value.
Ten thousand	10,000 (10x10x10x10)	round (rounded)	to change a number to a more convenient value.
thousands	1,000 (10x10x10)	negative number	any number less than zero
hundreds	100(10x10)	partition	a strategy that splits (partitions) numbers into smaller addends,
tens	10	digit	symbol used to show a number.
ones	1	interval	between two points or values.
zero	0	sequence	ordered sets of numbers, shapes or other mathematical objects, arranged according to a rule.
place value	the value of a digit depending on its place in a number.	linear sequence	A sequence that that increases or decreases from term to term by a constant amount
greater than	is more than		

Diagram / Key Information

Negative Numbers

$$3 - 8 = -5$$

$$-6 + 11 = 5$$

Round Any Number

Rounding to the nearest 1000

Rounding to the nearest 100 000

Rounding to the nearest 10 000

Rounding to the nearest 1 000 000

Numbers to Ten Million

3 926 471

Millions	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones
3	9	2	6	4	7	1

three million, nine hundred and twenty-six thousand, four hundred and seventy-one

3 926 471
3 926 000 471

Investigate/Homework tasks

- Homework will be set from the booklet issued by your teacher
- You should complete at least 30 minutes of maths tasks on Maths Whizz (not games). Please attend help sessions if you do not have access to the internet at home
- Additional work you could complete:
 - Find out more about the meaning of the vocabulary list using <http://www.amathsdictionaryforkids.com/>
- To challenge yourself:
 - Investigate the key questions typed in blue text
 - Explain the key questions typed in purple text

Key skills/Timeline/Topic Questions

Topic: Place Value

Year: 6

NC Strand: Number

- | | |
|---|---|
| <ul style="list-style-type: none">• Why is the zero in a number important when representing large numbers• Why do we round up when the following digit is 5 or above?• Which place value column do we look at when rounding to the nearest hundred thousand?• What is the purpose of rounding? | <ul style="list-style-type: none">• Are all negative numbers whole numbers?• Why does positive one added to negative one equal 0. Can you use a number line to explain this?• Draw me a picture to show 5 subtract 8• Show 5 more than negative two on a number line |
