## **Edward Peake Church of England Middle School**

Topic: Electricity Year: 6 Strand: Physics

## What should I already know?

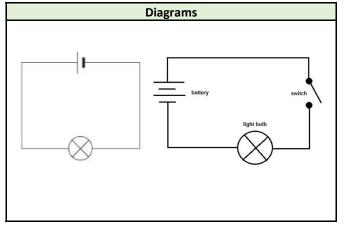

- Electricity is a form of energy that can be carried by wires and is used for heating and lighting, and to provide power for devices.
- Sources of light and sound may need electricity to work.
- Where **electricity** cones from
- Which appliances need electricity
- What a circuit is, the components of a circuit and how it works.
- What electrical conductors and insulators are.
- What happens when a **switch** is added to a circuit.
- What **forces** and **resistance** are.

Circuit Symbols				
Symbol	Component			
—(A)—	ammeter			
<b>→</b> + <b>→</b>	battery			
$\longrightarrow$	bulb			
$\overline{}$	buzzer			
<del> </del>	cell			
<u> </u>	motor			
	resistor			
	<b>switch</b> (open)			
0	switch (closed)			

## Investigate!

- Match circuit symbols to their meanings and their words.
- Predict, then investigate what happens when more batteries are added to a circuit. Explain why this happens.
- Predict, then investigate what happens when more bulbs, motors are added to a circuit. Explain why this happens.
- Systematically identify the effect of changing one component at a time in a circuit.
- Use **circuit** symbols when representing a simple **circuit** in a diagram.
- Design and make a set of traffic lights, a burglar alarm or some other useful **circuit**.
- Investigate what happens when the **voltage** of the battery changes.
- Investigate what happens when the length of the wires changes.
- Investigate what happens when you add a resistor to a circuit.
- Use ammeters to measure the current in a circuit.

	Vocabulary			
ammeter	measures the current in a circuit			
appliances	a <b>device</b> or machine in your home that you use to do a job such as cleaning or cooking. <b>Appliances</b> are often <b>electrical</b> .			
battery	small <b>devices</b> that provide the <b>power</b> for <b>electrical</b> items such as torches			
bulb	the glass part of an <b>electric</b> lamp, which gives out light when <b>electricity</b> passes through it.			
buzzer	an <b>electrical device</b> that is used to make a buzzing sound			
cell	a synonym for <b>battery</b>			
circuit	a complete route which an <b>electric current</b> can flow around			
component	the parts that something is made of			
conductor	a substance that heat or <b>electricity</b> can pass through or along			
current	a flow of <b>electricity</b> through a <b>wire</b> or <b>circuit</b>			
device	an object that has been invented for a particular purpose			
electricity	a form of <b>energy</b> that can be carried by <b>wires</b> and in used for heating and lighting, and to provide <b>power</b> for <b>devices</b>			
energy	the <b>power</b> from <b>sources</b> such as <b>electricity</b> that makes machines work or provides heat			
fuel	a substance such as coal, oil, or petrol that is burned to provide heat or <b>power</b>			
generate	cause it to begin and develop			
insulator	a non-conductor of electricity or heat			
mains	where the supply of water, <b>electricity</b> , or gas enters a building			
motor	a <b>device</b> that uses <b>electricity</b> or fuel to produce movement			
power	<b>Power</b> is <b>energy</b> , especially <b>electricity</b> , that is obtained in large quantities from a fuel <b>source</b> and used to operate lights, heating, and machinery.			
resistance	a force which slows down a moving object or vehicle			
resistor	a part of an electric <b>circuit</b> that provides resistance to some of the <b>current</b>			
source	where something comes from			
switch	a small control for an <b>electrical device</b> which you use to turn the <b>device</b> on or off			
voltage	the force of an electric current as measured in volts			
wires	a long thin piece of metal that is used to fasten things or to carry <b>electric current</b>

Topic: Electricity		16	aı. U	Strand: Physics		
Question 1: Write the name for the component that each of these symbols represent.	Start of unit:	End of unit:		Explain what will happen if b is added to a working	Start of unit:	End of unit:
—  r  F						
$-\!\!\!\otimes\!\!\!-\!\!\!\!-$						
$\Box$						
<u></u> — ⊢ —				Shorter wires will make	Start of	End of
- NA				er. True or False?	unit:	unit:
			true			
			false			
<del></del>				Explain what a conductor	Start of unit:	End of unit:
Question 2: Which of these circuits light?	will Start of unit:	End of unit:				
<u> </u>			Question 7: (tick three):	A circuit will not work if	Start of unit:	End of unit:
			there is no	pattery		
			the switch i	s off		
			there is a bi	eak in the circuit		
Question 3: Explain what will happy another battery is added to a circui		End of unit:	there is no	switch		
with a bulb.		+				
			Question 8: ammeter in	What is the function of an a circuit?	Start of unit:	End of unit:
			measures the circuit	ne length of the wires in a		
			measures th	ne current in a circuit		
			measures h component	ow heavy the s are		

Question 9: Imagine you only have this equipment.  Draw a circuit using circuit symbols featuring this equipment.  1 switch  3 cells (batteries)  Start of unit:	End of unit:
Question 10: Look at this circuit. The buzzer is currently not very loud. What could you	
do to make it louder?  Start of unit:	End of unit:
