

# Calculations Policy / Pathway

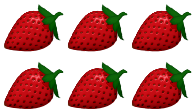

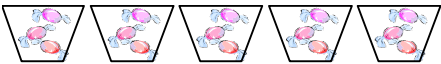

Addition		
Year 1	Year 2	Year 3
<p><b><u>+ = signs and missing numbers</u></b></p> <p>Children need to understand the concept of equality before using the '=' sign. Calculations should be written either side of the equality sign so that the sign is not just interpreted as 'the answer'.</p> $2 = 1 + 1$ $2 + 3 = 4 + 1$ $3 = 3$ $2 + 2 + 2 = 4 + 2$ <p>Missing numbers need to be placed in all possible places.</p> $3 + 4 = \quad \quad = 3 + 4$ $3 + \quad = 7 \quad \quad 7 = \quad + 4$ $+ 4 = 7 \quad \quad 7 = 3 + \quad$ $+ \nabla = 7 \quad \quad 7 = \quad + \nabla$ <p><u>Activities</u></p> <p>Children should have access to a wide range of counting equipment, everyday objects, as well as hoops, sorting trays, number tracks and numbered number lines.</p> <p><u>Teacher modelling</u></p> <p>Drawing jumps on numbered number lines to support understanding of the mental method</p> <p><u>Children</u></p> <p>To create their own jumps using rulers, fingers, pens, bodies etc.</p> $7 + 4$ 	<p><b><u>+ = signs and missing numbers</u></b></p> <p>Continue using a range of equations as in Year 1 but with appropriate, larger numbers. Extend to  <math>14 + 5 = 10 +</math>  and  <math>32 + \quad + \quad = 100 \quad 35 = 1 + \quad + 5</math></p> <p><b><u>Partition into tens and ones and recombine</u></b></p> $12 + 23 = 10 + 2 + 20 + 3$ $= 30 + 5$ $= 35$ <p><b><u>Count on in tens and ones</u></b></p> $23 + 12 = 23 + 10 + 2$ $= 33 + 2$ $= 35$ <p><b><u>Partitioning and bridging through 10.</u></b></p> <p>The steps in addition often bridge through a multiple of 10 e.g.  Children should be able to partition the 7 to relate adding the 2 and then the 5.  <math>8 + 7 = 15</math></p>  <p><b><u>Add 9 or 11 by adding 10 and adjusting by 1</u></b></p> <p>e.g.  Add 9 by adding 10 and adjusting by 1  <math>35 + 9 = 44</math></p> 	<p><b><u>+ = signs and missing numbers</u></b></p> <p>Continue using a range of equations as in Year 1 and 2 but with appropriate, larger numbers.</p> <p><b><u>Partition into tens and ones</u></b></p> <ul style="list-style-type: none"> <li>Partition both numbers and recombine.</li> <li>Count on by partitioning the second number only e.g.  <math>36 + 53 = 53 + 30 + 6</math> <math>= 83 + 6</math> <math>= 89</math></li> </ul> <p><u>Add a near multiple of 10 to a two-digit number</u></p> <p>Secure mental methods by using a number line to model the method. Continue as in Year 2 but with appropriate numbers e.g. <math>35 + 19</math> is the same as <math>35 + 20 - 1</math>.</p> <p>Children need to be secure adding multiples of 10 to any two-digit number including those that are not multiples of 10.  <math>48 + 36 = 84</math></p>  <p><b><u>pencil and paper procedures</u></b></p> $83 + 42 = 125$ <p><i>either</i> <span style="float: right;"><i>or</i></span></p> <p><b>1. Vertical expansion</b> <span style="float: right;"><b>2. Horizontal expansion</b></span></p> $\begin{array}{r} 83 \\ + 42 \\ \hline 5 \\ \hline 120 \\ 125 \end{array}$ $80 + 3$ $+ 40 + 2$ $120 + 5 = 125$
Addition		

Year 4	Year 5	Year 6																																
<p><b><u>+ = signs and missing numbers</u></b> Continue using a range of equations as in Year 1 and 2 but with appropriate numbers.</p> <p><b><u>Partition into tens and ones and recombine</u></b> Either partition both numbers and recombine or partition the second number only e.g.  <math display="block">55 + 37 = 55 + 30 + 7</math> <math display="block">= 85 + 7</math> <math display="block">= 92</math></p> <p><b><u>Add the nearest multiple of 10, then adjust</u></b></p> <p>Continue as in Year 2 and 3 but with appropriate numbers e.g. <math>63 + 29</math> is the same as <math>63 + 30 - 1</math></p> <p><b><u>Pencil and paper procedures</u></b>  <math>367 + 185 = 431</math>  <b>either</b>                      <b>or</b></p> <table style="display: inline-table; vertical-align: middle;"> <tr><td style="text-align: right; padding-right: 10px;">367</td><td style="text-align: left;">300 + 60 + 7</td></tr> <tr><td style="text-align: right; padding-right: 10px;">+185</td><td style="text-align: left;">100 + 80 + 5</td></tr> <tr><td style="text-align: right; padding-right: 10px;">12</td><td style="text-align: left;">400 + 140 + 12 = 552</td></tr> <tr><td style="text-align: right; padding-right: 10px;">140</td><td></td></tr> <tr><td style="text-align: right; padding-right: 10px;">400</td><td></td></tr> <tr><td style="text-align: right; padding-right: 10px;">552</td><td></td></tr> </table> <p><b>leading to</b></p> <table style="display: inline-table; vertical-align: middle;"> <tr><td style="text-align: right; padding-right: 10px;">367</td><td></td></tr> <tr><td style="text-align: right; padding-right: 10px;">+185</td><td></td></tr> <tr><td style="text-align: right; padding-right: 10px;">552</td><td></td></tr> <tr><td style="text-align: right; padding-right: 10px;">11</td><td></td></tr> </table> <p>Extend to decimals in the context of money.</p>	367	300 + 60 + 7	+185	100 + 80 + 5	12	400 + 140 + 12 = 552	140		400		552		367		+185		552		11		<p><b><u>+ = signs and missing numbers</u></b> Continue using a range of equations as in Year 1 and 2 but with appropriate numbers.</p> <p><b><u>Partition into hundreds, tens and ones and recombine</u></b> Either partition both numbers and recombine or partition the second number only e.g.  <math display="block">358 + 73 = 358 + 70 + 3</math> <math display="block">= 428 + 3</math> <math display="block">= 431</math></p> <p><b><u>Add or subtract the nearest multiple of 10 or 100, then adjust</u></b> Continue as in Year 2, 3 and 4 but with appropriate numbers e.g. <math>458 + 79 =</math> is the same as <math>458 + 80 - 1</math></p> <p><b><u>Pencil and paper procedures</u></b> Extend to numbers with at least four digits  <math>3587 + 675 = 4262</math></p> <table style="margin-left: 40px;"> <tr><td style="text-align: right;">3587</td></tr> <tr><td style="text-align: right;">+ 675</td></tr> <tr><td style="text-align: right; border-top: 1px solid black;">4262</td></tr> <tr><td style="text-align: right; padding-left: 10px;">1 1 1</td></tr> </table> <p>Revert to expanded methods if the children experience any difficulty. Extend to up to two places of decimals (same number of decimals places) and adding several numbers (with different numbers of digits).</p> <table style="margin-left: 40px;"> <tr><td style="text-align: right;">72.8</td></tr> <tr><td style="text-align: right;">+54.6</td></tr> <tr><td style="text-align: right; border-top: 1px solid black;">127.4</td></tr> <tr><td style="text-align: right; padding-left: 10px;">1 1</td></tr> </table>	3587	+ 675	4262	1 1 1	72.8	+54.6	127.4	1 1	<p><b><u>+ = signs and missing numbers</u></b> Continue using a range of equations as in Year 1 and 2 but with appropriate numbers.</p> <p><b><u>Partition into hundreds, tens, ones and decimal fractions and recombine</u></b> Either partition both numbers and recombine or partition the second number only e.g.  <math display="block">35.8 + 7.3 = 35.8 + 7 + 0.3</math> <math display="block">= 42.8 + 0.3</math> <math display="block">= 43.1</math></p> <p><b><u>Add the nearest multiple of 10, 100 or 1000, then adjust</u></b> Continue as in Year 2, 3, 4 and 5 but with appropriate numbers including extending to adding 0.9, 1.9, 2.9 etc</p> <p><b><u>Pencil and paper procedures</u></b> Extend to numbers with any number of digits and decimals with 1, 2 and/or 3 decimal places.  <math>13.86 + 9.481 = 23.341</math></p> <table style="margin-left: 40px;"> <tr><td style="text-align: right;">13.86</td></tr> <tr><td style="text-align: right;">+ 9.481</td></tr> <tr><td style="text-align: right; border-top: 1px solid black;">23.341</td></tr> <tr><td style="text-align: right; padding-left: 10px;">1 1 1</td></tr> </table> <p>Revert to expanded methods if the children experience any difficulty.</p>	13.86	+ 9.481	23.341	1 1 1

Division		
Year 1	Year 2	Year 3
<p><u>Sharing</u> Requires secure counting skills -see counting and understanding number strand Develops importance of one-to-one correspondence See appendix for additional information on x and ÷ and aspects of number</p> <p>Sharing – 6 sweets are shared between 2 people. How many do they have each?</p>  <p>Practical activities involving sharing, distributing cards when playing a game, putting objects onto plates, into cups, hoops etc.</p> <p><u>Grouping</u> Sorting objects into 2s / 3s/ 4s etc How many pairs of socks are there?</p>  <p>There are 12 crocus bulbs. Plant 3 in each pot. How many pots are there? Jo has 12 Lego wheels. How many cars can she make?</p>	<p><u>÷ = signs and missing numbers</u>  <math>6 \div 2 = \quad = 6 \div 2</math>  <math>6 \div \quad = 3</math>      <math>3 = 6 \div \quad</math>  <math>\div 2 = 3</math>      <math>3 = \div 2</math>  <math>\div \nabla = 3</math>      <math>3 = \div \nabla</math></p> <p><u>Grouping</u> Link to counting and understanding number strand Count up to 100 objects by grouping them and counting in tens, fives or twos;... Find one half, one quarter and three quarters of shapes and sets of objects <math>6 \div 2</math> can be modelled as: There are 6 strawberries. How many people can have 2 each? How many 2s make 6?</p> <p><math>6 \div 2</math> can be modelled as:</p>  <p>In the context of money count forwards and backwards using 2p, 5p and 10p coins</p> <p>Practical grouping e.g. in PE</p> <p>12 children get into teams of 4 to play a game. How many teams are there?</p> 	<p><u>÷ = signs and missing numbers</u> Continue using a range of equations as in Year 2 but with appropriate numbers.</p> <p><u>Understand division as sharing and grouping</u> <math>18 \div 3</math> can be modelled as: Sharing – 18 shared between 3 (see Year 1 diagram) OR Grouping - How many 3's make 18?</p>  <p><u>Remainders</u> <math>16 \div 3 = 5 \text{ r}1</math> Sharing - 16 shared between 3, how many left over? Grouping – How many 3's make 16, how many left over? e.g.</p> 

Division

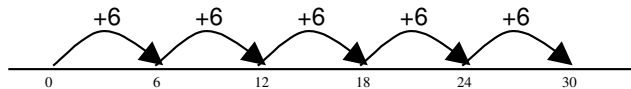

Year 4

**÷ = signs and missing numbers**

Continue using a range of equations as in Year 2 but with appropriate numbers.

**Sharing and grouping**

30 ÷ 6 can be modelled as:  
grouping – groups of 6 placed on no. line and the number of groups counted e.g.

sharing – sharing among 6, the number given to each person

Remainders

41 ÷ 4 = 10 r1

**41 = (10 x 4) + 1**

**Pencil and paper procedures**

72 ÷ 5 lies between 50 ÷ 5 = 10 and 100 ÷ 5 = 20

\* Partition the dividend into multiples of the divisor:

e.g. 72 = 50 + 22

50 ÷ 5 = 10

22 ÷ 5 = 4r2 → 10 + 4r2 = 14 r 2

OR

72 - 50 (10 groups)

22 - 20 (4 groups)

2

Answer : 14 remainder 2

\* For a more detailed explanation see paper 'Updating division'.

Year 5

**÷ = signs and missing numbers**

Continue using a range of equations as in Year 2 but with appropriate numbers.

**Sharing and grouping**

Continue to understand division as both sharing and grouping (repeated subtraction).

Remainders

Quotients expressed as fractions or decimal fractions  
61 ÷ 4 = 15 ¼ or 15.25

**Pencil and paper procedures**

256 ÷ 7 lies between 210 ÷ 7 = 30 and 280 ÷ 7 = 40

\* Partition the dividend into multiples of the divisor:

e.g. 256 = 210 + 46

210 ÷ 7 = 30

46 ÷ 7 = 6r4 → 30 + 6r4 = 36r4

OR

256

256

- 210 (30 groups)

210 + 46

46

- 42 (6 groups)

30 + 6r4

4

Answer: 36 remainder 4

\* For a more detailed explanation see paper 'Updating division'.

Year 6

**÷ = signs and missing numbers**

Continue using a range of equations as in Year 2 but with appropriate numbers.

**Sharing and grouping**

Continue to understand division as both sharing and grouping (repeated subtraction).

Remainders

Quotients expressed as fractions or decimal fractions  
676 ÷ 8 = 84.5

**Pencil**

**and paper procedures**

977 ÷ 36 is approximately 1000 ÷ 40 = 25

\* Partition the dividend into multiples of the divisor:

e.g. 977 = 720 + 180 + 77

720 ÷ 36 = 20

180 ÷ 36 = 5

77 ÷ 36 = 2r5 → 20 + 5 + 2r5 = 27r5

OR

977 - 720 (20 groups)

257 - 180 (5 groups)

77 - 72 (2 groups)

5

Answer: 27 5/36

\* For a more detailed explanation see paper 'Updating division'.
