

Pain      in      mouth

I might have pain in my mouth. It could be tooth pain

It might be wobbly

If I have a wobbly tooth, it means it will fall out

It might hurt, but it will get better

 I will have a  gap in my  teeth.

 A new  tooth will  grow soon

If  I am in  pain, I can  ask an  adult for  help

I can have a  break,  ask for  squeezes or use a  choosing  board

 I have to keep my  body  safe, even when  I am  hurting
