

THE GESHER GAZETTE

PRIMARY CLASS TO LAUNCH ROCKETS

This term Zayit & Seorah have embarked on an extraordinary journey in our exciting project, 'Space and Transport.' Our project began with an exciting twist—our students designed their own aliens, who mysteriously broke into our school over the weekend and invited us on a journey to space!

As we set out on our journey to space, we needed to understand the different modes of transport that would take us from Earth to the stars. Each week, the children have embarked on a new section of the journey, exploring a different mode of transport that would carry them closer to their alien destination. To bring these lessons to life, the children created wonderful freeze-frame images using the plasticine figures they had crafted, depicting each mode of transport along the way.

In addition to the freeze-frame images, Zayit & Seorah have worked on writing descriptive captions for each section of the journey. As we near the final part of our journey, we're preparing for a rocket launch into space! An exciting part of the project will be creating our own rockets from junk modelling. Once we're there, we'll explore what space is really like and put our learning to the test by writing a non-fiction report on our experiences. It's been an adventure full of discovery, and we can't wait to see where this part of the journey will take us next!

Student Voice

On Friday, March 7th, some of our Student Council members will represent Geshher at Stanmore College, exploring an inspiring leadership and citizenship program. This is a fantastic opportunity to build connections, develop leadership skills, and bring new ideas back to our school community!

Student Moment of REACH Values

Jacob demonstrated care for others in his class community this week by ensuring no one is left out and encouraging others to include everyone.
