## SUMMER UPGRADES AT GESHER

This summer saw the next phase of work take place at Gesher. One of our most significant additions is the brand-new Multi-Use Games Area (MUGA), which will be ready for use next week. The MUGA is designed to accommodate a variety of sports, including netball, basketball, and tennis. This space will enhance options during play-time and PE, allowing our students to engage in physical activity, develop their teamwork skills, and promote overall wellness. In addition to the MUGA, we now have our very own Gesher football pitch, which will be ready for its first official match after the October half-term.

As we await the turf to settle, we look forward to seeing our students take the field and I have no doubt this space will be used to the full extent. We have made significant upgrades to the bathrooms throughout the school. We hope these enhancements support all aspects of our students' well-being. Looking ahead, we are excited to share that our next initiative will focus on the development of a Life Skills module. This addition aims to enhance our Bridges curriculum and provide a space to equip students with essential life skills that extend beyond the classroom.
