

## **Covid Premium 2020 – 2021**

The school received £13,760 Covid catch up Premium. This amount was used to provide Maths Tutoring for pupils whose outcomes had been adversely affected by Covid. This was provided by the University of Sunderland. We also provided additional support for pupils by employing additional classroom support in the morning. The same support then provided gap filling or pre-teach activities for pupils in the afternoons by targeting any misconceptions or giving advance teaching of future concepts. Additional money was also used for purchasing Reading Plus across the school. This has been used as a daily intervention programme and can be used at home and at school. Reading Planet was also used to encourage children to read at home. As a results, some children became more engaged in reading and gaps in mathematical progression were reduced in number and place value aspects of the curriculum.
