Revision Timetable	39

INTRODUCTION

Welcome to your copy of "Making Revision Work for You" for the 2024 GCSEs.

The coming months are an important time for Y11 students as they prepare for their mock and summer examinations. This booklet is aimed at helping all students plan and use revision time effectively as well as giving parents/guardians some tips on how they can help and support.

The **Spring term** from now onwards is particularly crucial. Therefore making good use of **evenings, weekends, half term** and **holidays** is essential if you are to do your best in the exams. It is important to have a balance between work, social time and family time but now is the time that clear, focused revision begins in earnest.

This booklet includes some tips on how parents can encourage, enable and support students to revise effectively. It also contains subject-by-subject revision advice which, in some cases, will be supported by material that you will receive directly from your subject teachers.

Please read this revision support booklet and;

- as a parent help your child to get organised, and
- as a student work with your parent to ensure a good, focused revision schedule.

Checking progress from time to time is very helpful, too. Subject teachers are more than happy to provide any other guidance that may be needed.

You will achieve your potential with:

- ✓ a clear revision schedule (see back of booklet for EXAMPLE timetables)
- ✓ concentration on areas in need of improvement
- ✓ hard work, determination and sustained effort
- ✓ support from family, peers and staff
- ✓ a sensible and good balance between work and relaxation.

Students have the opportunity to practice revision techniques during tutor time.

If you have any concerns, please do contact the relevant member(s) of staff at school. Never give up!

Mr Blight

Students – How to revise

- KEEP YOUR MOBILE PHONE IN A SEPARATE ROOM WHEN REVISING OR WORKING - NO SCREEN/NOTIFICATION/MESSAGING DISTURBANCE
- Plan your work draw up a timetable of what you need to revise, and when you plan to do it.
- Don't be too ambitious set targets which are hard, but achievable.
- Revising often for shorter periods is better than studying for long stretches, less frequently. Most people begin to lose concentration after 30 minutes. Most people learn best near the beginning and ending of a revision session – so, the more breaks, the more beginnings and endings you have.
- If you find your attention drifting, take a 10 minute break physical activity, such as a short walk or stretching, can be helpful then go back to your studies. Taking a drink of water helps keep your body hydrated and alert.
- You will be aware that people learn best in different ways. Think about how you learn best.
- Don't just re-read notes, try:
 - ✓ highlighting key words
 - ✓ making mind maps, spider diagrams, timelines, flow charts, Venn diagrams, etc.
 - ✓ summing up key points
 - ✓ making lists
 - ✓ writing down key points on cards and using them to test yourself, or getting someone to test you
 - ✓ teaching or explaining to someone else what you have learned ✓ producing a poster
 - making up a rap, poem, or song, based on what you are learning
 - producing a storyboard or cartoon, based on what you are learning
 - ✓ talking over what you have learned either in your mind, or out loud, or to someone else
 - using different rooms, or different areas of one room, to study different topics when you return:
 - each location should remind you of what you have learned, and
 - thinking about each location during the exam can trigger memories, too

✓ walking around or assigning a gesture or movement to a fact or topic can help some people learn

✓ reviewing what you have learned so far, ideally by testing yourself, doing a mind map or list etc, before beginning again.

Some useful resources

- The Internet offers a wealth of revision material so long as you do not make the mistake of spending too long surfing.
- Materials available on the exam boards' websites, such as past papers, offer excellent practice and revision opportunities.
- Edtech for Revision

Edtech (Education Technologies) is playing an increasing role in your education here at Duke's. You will have, I'm sure, made use of Chromebooks and other technologies in your lessons to help you with your work, and perhaps mostly to check on your understanding through various quizzes on vocabulary and on other key facts, techniques and subject-specific ways of learning.

As part of your revision, it's really important that you revisit your Google Classrooms where you should find lesson slides from previous lessons, links to revision guides, digital copies of knowledge organisers and many other resources that can help with your revision.

You should also use those revision websites that you will know about from your teachers, eg Seneca, BBC Bitesize, Hegarty Maths, Youtube etc.

There are also loads of websites that have various revision tools like flash cards and mind maps etc. You can also use Quizizz and Kahoot games to check your vocabulary and subject understanding - there are lots of pre-made quizzes on these sites.

- ✓ <u>www.bbc.co.uk/schools/revision</u> BBC Bitesize is one of the best-known educational websites, and covers a variety of subjects. Recent additions to the site include revision help for students studying PE and Information Technology.
- www.schoolsnet.com this is mainly aimed at teachers, but it also contains links to around 140 revision sites on all the major National Curriculum subjects.
- www.gcse.com useful revision information.
- ✓ <u>www.letts-successzone.co m</u>, <u>www.s-cool.co.u k</u>, <u>www.whsmith.co.u k</u> all of these addresses provide information on revision guides.

- ✓ <u>www.britannica.com</u> general information.
- ✓ <u>www.gcsepod.co.uk/home/</u> some excellent revision materials for a wide variety of subjects.
- ✓ <u>www.aqa.org.uk</u> _ for past papers for courses following the AQA specifications
- ✓ <u>www.ocr.org.uk</u> for past papers for courses following the OCR specifications
- www.edexcel.org.uk for past papers for courses following the Edexcel/Pearson specifications
- ✓ <u>Revision Books/Guides:</u> There is a huge range of revision books available from_well-known

publishers like Letts and York Notes, many of which can be found on the shelves of WH Smiths, Waterstones and other good bookshops. Duke's have provided revision guides for most subjects.

- All BBC Bitesize television programmes are worthwhile viewing for students revising for exams.
- ✓ Duke's Google Classroom for all subjects

SECONDARY SCHOOI

Parents – How you can help

- We all remember how stressful exam time is, and how important the right kind of support from parents and other members of the family can be. Try to ignore the occasional slammed door, long silence or tantrum.
- Read through *Students How to revise* (above), and the various subject-specific pages, and see what you can do to help.
- Providing a quiet study space, away from distractions, is important. However, different people learn in different ways: some people learn better if there is appropriate background music, or by talking aloud, or pacing, so absolute silence isn't always the best approach.
- Showing an interest in progress, and providing regular praise or rewards can be very supportive – sometimes, even a simple "Well done!" can mean a lot.
- Remember, one of the best ways of understanding and learning something is explaining or teaching it to someone else – so make yourself available, ask questions and so on.
- Make sure your child sets a realistic revision timetable, starts early, and sticks to it, without overdoing things. See the back of this booklet for an example weekly revision template.
- Timetabling in 'down time', exercise or sports, meals (of course), social and relaxation time is also important to a successful and fruitful revision schedule. Finding the right balance is key.

At home

Help your son or daughter produce a week by week revision timetable. You will find at the back of this booklet example weekly timetables for:

- whilst still in school and following normal lessons
- whilst on holidays (February and May ¹/₂ term and Easter holidays) or exam leave

Please copy the blank timetables at the back as required to create a week by week revision schedule.

CURRICULUM AREAS

Advice, tips, guidance and resources for successful revision:

English Language

1. Read widely:

Newspapers, novels, magazines, autobiographies, travel writing...try to step outside of your comfort zone and select texts that are challenging and different from what you normally read. There is an enrichment section in the library with texts specifically chosen because they are challenging and are of the style you will find in the English Language exams. Ask Mrs Littlewood for more details.

Write widely:

Different forms- letters, articles, reviews...different purposes- inform, explain, persuade. Practise planning, writing and reviewing and editing your work. You could search for interesting pictures to use for descriptive writing stimulus or use the past paper packs in Google Classrooms.

2. Google Classrooms

You will find past papers, knowledge organisers, revision tips uploaded into Google Classrooms. If you can't access your Google Classrooms account, please see a technician.

3. Use revision websites. Some of the best include:____

o http://www.mrbruff.com/

- o www.bbc.co.uk/schools/g cseb itesize/e nglish
- o <u>www.geoffbarton.co.uk</u>

4. Clips on YouTube

Search for Mr Bruff - use these to help you to make detailed notes about your exam topics. He not

only has videos on how to answer each question but also models top mark answers.

5. **Podcasts – Mr Bruff** also has recorded several podcasts about key aspects of the English Language exam.

6. Revision Guides

We recommend the BBC bitesize revision guide, we have some available to borrow or you could buy your own

https://www.amazon.co.uk/Bitesize-English-Language-Revision-Guide/dp/140 6685836. It explains each question for both papers in detail – you can use this information to make mind-maps / flashcards. There are also sections with mock exam questions. Use the contents page at the front of the book to quickly find the section you'd like to work on.

7. Improve your vocabulary

Practise writing tasks with a dictionary and thesaurus by your side- edit and review your work at the end asking yourself- does this vocabulary add to the intended impact/ effect? Reading widely can also impact your vocabulary use positively.

8. Respond to personalised targets

Ensure that you are clear about your strengths and areas for development- do you need to practise all of the skills or just some of them? Speak to your teacher if you are unsure.

9. Past papers

Find AQA past papers on Google Classroom, the AQA website and in your revision guides- bring them or email them to your teachers for marking.

SECONDARY SCHOOL

English Literature

1. Read and reread your set texts (The Strange Case of Dr. Jekyll and Mr. Hyde, An Inspector Calls and Macbeth) and poetry collection (Power and Conflict):

As the exams are closed book, the expectation is that you know your texts very well, understand how they are structured and are able to recall quotes to analyse for method and effect.

Therefore having read the play or poetry in class once or twice is not enough- you need to be going over these at home and in independent study. Copies of the texts are available in your Google Classroom.

In preparation for Unseen Poetry challenge yourself to read poetry weekly, or more regularly and decide on what is the central theme of the poem, the methods used and the effect of these methods. The more poetry you read the easier it becomes!

2. Supporting your understanding of the texts:

Remember for Jekyll and Hyde, Macbeth, An Inspector Calls and Power and Conflict poetry understanding the writer and the context is an integral part of the revision of the texts. Use your class notes, booklets and revision material to strengthen your understanding of context, themes, ideas and perspectives.

3. Timed writing:

Remind yourself of the paragraph format PEEACL for Macbeth and An Inspector Calls, PEAL for poetry and set yourself timed writing sessions in response to past questions or created questions.

4. Google Classrooms

You will find <u>past papers</u>, <u>knowledge organisers</u>, <u>revision guides and tips</u> uploaded into Google Classrooms. If you can't access your Google Classrooms account</u>, please see a technician.

5. Use revision websites. Some of the best include:

https://www.bbc.co.uk/bitesize/examspecs/zxqncwx https://revisionworld.com/a2-level-level-revision/english-literature-gcse-level https://senecalearning.com/en-GB/blog/gcse-english-literature-revision/ https://www.douglaswise.co.uk/tag/gcse-english-literature/

6. Use revision clips on 'You Tube':

Search for **Mr Bruff English Literature GCSE** or **Mr Salles English Literature GCSE**- use the videos to help you to make detailed notes about your texts – plays, poetry or model exam questions. They not only have videos on how to answer each question but also models top mark answers.

7. Revision Guides

We have a small number of revision guides in the department which can be used in school to support your study. Alternatively you can pick them up second hand or from an online or high street book shop.

Good revision guides to look out for are ones by York notes, CGP or Collins.

e.g.

https://www.amazon.co.uk/York-Notes-GCSE-Rapid-Revision/dp/129227087X/ref=sr_1_3?crid=3 GXU5R9RRPGA1&keywords=york+notes+rapid+revision+macbeth&qid=1699786993&s=books& sprefix=york+notes+rapid+revision%2Cstripbooks%2C73&sr=1-3

8. **Respond to personalised targets**

Ensure that you are clear about your strengths and areas for development- do you need to practise all of the skills or just some of them? Speak to your teacher if you are unsure about how to improve.

9. Past papers

Find AQA past papers on Google Classroom, the AQA website and in your revision guides- bring them or email them to your teachers for marking.

Mathematics

In order for students to achieve their desired grade in maths they must revise for short spells, **but often**! The amount of content in the GCSE maths paper requires them to constantly revisit a variety of topics to ensure everything is remembered well and that they are familiar with how to apply their knowledge and skills in exam questions.

Ideally, students should be doing about five hours of maths revision a week in the run up to exams - this time needs to be effective. Targeting weak topics is essential because answering the questions on these topics will definitely improve final grades. Revision should be a mixture of learning key facts and practising questions, always remembering to check answers.

Please write death	. in block capitals	Cardidate sustant

GCSE MATHEM/	ATICS		H
MATHEM	ATICS per1 Non-Calcu	lator	Н
MATHEM, Higher Tier Pa			1 hour 30 minute
MATHEM/ Higher Tier Pa	per 1 Non-Calcu		
MATHEM	Morning		

Students sit <u>AQA Linear Maths 8300</u>. By now, their tier of entry has almost certainly been decided, so students know whether they are sitting the foundation or higher paper. The foundation paper has a maximum achievable grade of 5 (known as a 'strong pass' and equivalent to the old B grade). The dates for **all three** papers are as follows:

Paper 1 (non-c <mark>alc</mark>):	Thursday 16th May,
Paper 2 (calc):	Monday 3rd June,
Paper 3 (calc):	Monday 10th June.

Extra Support in School

Mock exam (PPE) analysis sheet: Following your January mock exams, your Maths teacher will give you a personalised sheet of key topics; use this to guide your revision.

Revision Resources: All students will be provided with a white Exam Workbook in the new year, but the majority of revision resources are found online (see list below).

Homework: All Y11 students are given regular homework tasks; completing these to the best of your ability and **seeking help with tricky questions** is a key component of revising effectively. Make sure you do!

Google Classroom: all work set can be found on your *Google Classroom* account, including links to online lessons and revision sites. You can contact your Maths teacher directly, too, to ask for help, guidance or support with your revision.

Eedi - Every student has an individual login and password; the site offers tasks which are personalised, with accompanying videos to support individual student progress, as well as the option to complete 'Retrieval Practice'.

Great websites:

Be sure to visit

www.thenational.academy www.mathsgenie.co.uk www.corbettmaths.com www.drfrostmaths.com www.onmaths.com www.thirdspacelearning.com www.senecalearning.com

for video tutorials and exam questions. Be sure to check all answers.

Statistics

There are two GCSE statistics papers in the summer and each is worth 50% of the final mark. A calculator is available for both of the papers and there any of the material covered on the course can appear on either paper.

Revision

All students have access to a revision guide and workbook on Google Classroom that covers the course and provides example questions and exam style problems to complete. Students can also access Maths Genie (www.mathsgenie.co.uk/statistics) which has a specific section on GCSE statistics that focuses on the topics not covered in the GCSE maths course including past papers and mark schemes. Other websites that are focussed on statistics: <u>https://www.statsacademy.co.uk/</u>, and <u>https://mrshodgettsstatistics.com/</u>.

Revision Techniques

As with all mathematics subjects, the best way to revise is to complete exam style questions making sure that mark scheme is consulted to check the level of response needed. Students must be familiar with the terminology used in statistics and the correct use of these key phrases so will benefit from creating their own glossary of terms with definitions and examples of how they should be used.

Extra support in school

Revision is provided on Google Classroom to be completed in tutor sessions and staff are available to question when needed.

Science

Your preparation for science terminal exams should have two stages; learning and revising the work covered in lessons and applying your understanding to answer exam questions.

Learning & revising

• Download a copy of the syllabus from the OCR website or the google science classrooms.

https://www.ocr.org.uk/Images/234597-specification-accredited-gcse-twenty-first-century-sciencesuite-combined-science-b-j260.pdf

For biology:

https://www.ocr.org.uk/Images/234595-specification-accredited-gcse-twenty-first-century-science-suite-biol ogy-b-j257.pdf

For Chemistry:

https://www.ocr.org.uk/Images/234599-specification-accredited-gcse-twenty-first-century-science-suite-che mistry-b-j258.pdf

For physics:

https://www.ocr.org.uk/Images/234601-specification-accredited-gcse-twenty-first-century-science-suite-phy sics-b-j259.pdf

If you cannot find it, ask your teacher. Go through the syllabus statements identifying those you understand and the statements that require further study. Write a set of revision notes based on the topics you do not understand. Topics in bold are for higher tier students only.

Using the course revision guides or revision notes from the department. Read the information on the topics that you do not understand. Reading by itself rarely leads to remembering and understanding, so instead...

o re-write information that you have read in your own words,

o draw concept maps to link topics,

o create question and answer cards - any use them regularly

o try to teach your family and friends new and difficult ideas.

Revision guides are available from the school for Science and were given out in Y9.

Use the online science resources to revise all units. Find the 21st Century syllabus on seneca or bbc bitesize.

Applying your understanding

Once you have learnt and revised the material you now need to practise applying your understanding to answer exam questions. Complete as many past exam papers as possible, including those on the Google Team Drive and the hard copies given to you by your teacher. Remember the most important questions are those that you find difficult. Use the mark schemes, textbooks, revision guides, lesson notes and the internet to ensure all questions are completed.

Other sources of GCSE style questions include the exam practice questions in the textbook throughout each topic, the questions in the revision guides and redoing topic tests (speak to your teacher).

Extra support in school

Your science teachers are there to help you so if you have a question or are confused by a topic make the effort to see them before or after the lesson, before and after school or at break and lunch.

The science department will also be running after-school revision sessions.

If in doubt, ask!

Other useful websites:

- Biology: https://www.bbc.co.uk/bitesize/examspecs/z2synbk
- Chemistry: https://www.bbc.co.uk/bitesize/examspecs/zxy3frd

- <u>www.khanacademy.org/</u>
- www.senecalearning.com
- Duke's Google Classroom

Engineering

The Engineering GCSE contains a single 2 hour synoptic exam which is worth 60% of the overall grade. The specification for the course detailing all expectations for both the NEA and exam can be found here:

https://filestore.aqa.org.uk/resources/engineering/specifications/AQA-8852-SP-2017.PDF

The content of the exam will be based on 3 Assessment Objectives:

- AO1: Demonstrate knowledge and understanding of engineering principles and processes.
- AO2: Apply knowledge, understanding and skills in different contexts, including through the
- use of a range of tools, equipment, materials, components and manufacturing processes.
- AO3: Analyse and evaluate evidence in relation to a range of engineering contexts.

These objectives will be evaluated through the use of multiple choice questions, short and extended written answers and calculations.

Advice for preparing for the assessment

- 1. Ensure you have read up on and are familiar with all the Engineering materials and processes outlined in the specification. A significant proportion of the exam is designed to probe the depth of knowledge and how well they can apply this to unfamiliar, practical contexts.
- 2. Learn your Engineering Formulae and **always** write them down when answering the questions. Unlike many exams the marks for showing formulae are separate and you automatically lose marks for not including them.
- 3. Practice applying your knowledge to the real world. This will reinforce your learning and make it more likely that you will be able to respond to the unusual contexts presented in the exam
- 4. Review your old work, assessments and the information on GoogleClassroom
- 5. Watch engineering videos in your spare time. YouTube is full of videos explaining how things work that are intended as entertainment. These can increase your wider knowledge.

Revision Materials

A small number of revision guides are available in school. There are two different guides available for the course:

AQA GCSE (9-1) Engineering, ISBN 10: 1510425713 My Revision Notes: AQA GCSE (9-1) Engineering, ISBN 10: 1510425721

French

Google Classroom

Everything that you need is on our google classroom. The classroom is separated into different sections for all of the different parts of your exam.

There are resources for Foundation and Higher.

ANY work that you do bring it in or send it to me as a photo and I will give you feedback.

		= \
J	_	フ

Sentence Builders

Think about how we use them in lessons.

Go through a SMALL section one at a time.

Write down a section header on a page - challenge yourself to write 25 words. Send it to me or bring it in and I will give you feedback on it!

Writing Exam - 3 or 4 sections depending on tier

Foundation - 4 sections

- → 4 sentences to describe a picture
- → 5 sentences to translate English to French
- → 40 word writing NO CHOICE
- → 90 word writing Choice from 2 themes

Higher - 3 sections

- → 90 word writing Choice from 2 themes
- → 150 word writing Choice from 2 themes
- → Translation English to French

Speaking Exam - 4 parts

- 822
- → Photocard
- → Roleplay
- → General Conversation Part 1 YOU choose the theme
- → General Conversation Part 2 Another theme

If you're feeling brave record yourself and send it to me for some feedback

Reading Exam - 3 sections

Section A - questions and answers in English

- Section B questions and answers in French
- Section C translation French to English

Listening Exam - 2 sections

Section A - questions and answers in English Section B - questions and answers in French

Practice Papers

I have printed papers in ML2 - just come and see me to pick them up.

Other websites to use

BBC Bitesize - AQA GCSE French Seneca Learning - AQA GCSE French

DUKE'S

Geography

There are 3 examination papers in the summer. Papers 1 and 2 are worth 35% each and Paper 3 is worth 30% of the total marks for the course.

The examinations:

Paper 1: Living with the physical environment Paper 2: Challenges in the human environment Paper 3: Geographical applications (pre-release booklet and fieldwork)

Independent revision

All students have access to a CGP revision guide which we are using in lessons. Students can either borrow these and return them at the end of the year, or purchase them from school at a discounted cost of £3.50 (RRP£10). Students have also been given a revision pack which includes knowledge organisers and checklists for each unit. Additional revision materials are available on Google Classroom. These include links to revision videos, case study summaries, sample exam questions and key terms lists. Students also have access to Seneca where they can test their knowledge using the quizzes.

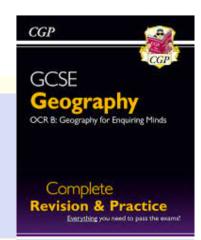

Revision techniques

Students would benefit from creating their own case study summaries and looking at past exam questions, particularly the extended 9 markers. Geographical processes and terminology can be revised using cue cards and mind maps. In the physical geography exam, formation of landforms is a common question.

Students would benefit from creating a diagram with bullet pointed lists to show the feature is formed. Students can also maximise their performance in paper 3 by creating model answers for the typical fieldwork questions.

Teacher supported revision sessions

Staff are offering additional revision sessions for students. These take place on a Monday and Friday lunchtime and after school on a Thursday. These 30 minute revision sessions cover specific areas of the syllabus and students can therefore drop in for the areas they feel they need support with. The timetable for this is available on Google Classroom.

History

Exams

There are four examination papers in the summer.

Paper 1 Medicine in Britain 1250-present and treatments and injuries in WW1

Paper 2 Elizabethan England c.1558-1588 and Superpower relations and the Cold War 1941-1991

Paper 3; The USA Conflict at home and aboard (Civil Rights and Vietnam) 1954-1975

Revision material:

Your google classroom has all your lesson and revision material and knowledge organisers on. You can purchase a revision guide for £2.50 from Miss Willett which will be paid back to you if they come back reusable.

Revision Schedule

Interventions will occur nearer the exams, please see your class teacher if you need any help. Complete all revision work on your Google Classroom in tutor time revision. Pupils should use the knowledge organisers revision guides given to them to help create spider diagrams, storyboards, timelines, quiz cards and any other techniques they are practicing in school.

Websites to help:

BBC Bitesize – GCSE History – Edexcel

Religious Education

There are 2 examination papers in the Summer of 2023 Each paper is worth **50%** of the total mark for the course. The Specification is called 'AQA Religious Studies A'

Component 1 – Study of Religion **Christian Beliefs** Christian Practices Jewish Beliefs **Jewish Practices**

Component 2 – Thematic Studies (all studied from the Christian Perspective):

Relationships and Families Religion and Life Religion, Peace and Conflict Religion, Crime and Punishment

Revision:

Students have been provided with a CGP revision guide (see below) A variety of past papers and mark schemes are also available on the AQA website

Revision Schedule

In terms of devising a revision schedule, students have already been advised to start reading their booklets on each topic, primarily to revisit key ideas and terms within the material covered in Year 9.10 and 11.

Cue cards and mind maps can be helpful revision aids to make at this point. Teachers also have useful revision summary sheets to give out for students to fill in. Once students are confident with the topic material, they should then progress to past papers and exam questions.

These can be found online here:

https://www.aga.org.uk/subjects/religious-studies/gcse/religious-studies-a-8062

- **Portfolio of work** (Nature, Vanita art and Illustration) **60%**
 - Throughout year 10 and year 11 students will have completed a portfolio of work demonstrating their ability to respond to different project briefs and explore a variety of material and techniques.
 - Opportunity will be provided for 'one to one' portfolio improvement sessions at lunchtimes and after school.
 - Students will also have a copy of the current assessment and grade boundaries Objectives and clear guidance will be given to ensure individual success.
 - Feel free to bring any drawing or personal projects to be marked too.

• External Set Assignment (exam) - 40%

AQA will provide a separate externally set assignment for each title, each with seven different starting points. Students must select and respond to one starting point from their chosen title.

A preparation period which can begin on or after 10 January is followed by 10 hours of supervised unaided work in which students are required to realise their intentions. Students must not undertake any further preparatory studies once the first period of supervised time starts.

So all work produced from 10 January and work in the 10 hour exam make up the 40% marks.

Exam (Supervised time – 10 hours split across 2/3/7 May)

- Following the preparatory period, students must undertake 10 hours of unaided focused study, under supervision.
- Top tips for parents
 - ✓ Encourage visits to art galleries and exhibitions.
 - Encourage use of sketchbook work at home drawing, painting, photography, etc. (minimum of one hour per week)
 - ✓ Encourage students to discuss their artwork and share their ideas.
 - Encourage them to take 30 Primary images of objects/people/animals relating to your theme.
 - Encourage them to do direct observation drawings of objects or your own photographs relating to your theme.
 - Encourage them to experiment using different art materials or photo editing apps on copies of your images
 - Encourage them to provide an opinion on how formal elements have been used in all artists pages and also your own experimental pieces

 Encourage them to access google classroom at Duke's Y11 art with all source material to support for the exam

Useful websites

The students will be directed to relevant websites appropriate to their themes. The following websites are useful in provided a broad and varied selection of art and design:

<u>https://www.bbc.co.uk/bitesize/subjects/z6hs34j</u> (this hyperlink Art section - great resource for evaluations and understanding the A01/02/03/04)

GCSE ART coursework hand-in:

	RETRIEVAL ACTIVITIES SET AIMING AT EXAM UNIT 1 – EXAM END OF YEAR 11								

The typical timeline of the Level 2 - Tech Award Construction course below:

The three components focus on the assessment of applied knowledge, skills and practices. These are all essential to developing a basis for progression and therefore learners need to achieve all components in order to achieve the qualification. The components are interrelated and they are best seen as part of an integrated whole rather than as totally distinct study areas.

Assessment

The three components in the qualification give learners the opportunity to develop broad knowledge and understanding of the construction and built environment sector, and specialist skills such as interpreting and designing a low-rise construction to a brief, construction of a practical outcome to specification and ensuring quality of outcome at Levels 1 and 2.

Internal assessment – Externally moderated

Externally moderated Components 2 and 3 are assessed through non-exam internal assessment. The non-exam internal assessment for these components has been designed to demonstrate application of the conceptual knowledge underpinning the sector through realistic tasks and activities.

This style of assessment promotes deep learning through ensuring the connection between knowledge and practice.

The components focus on the acquisition of practical skills and techniques used in industry for safe working practices to create a practically constructed outcome to a specification in either brickwork or carpentry and joinery, and quality control procedures to ensure an aesthetic, well-finished and accurate product.

Unit 1 Exam based unit at the end of Year 11 / Construction Technology

Students have one externally set exam that is performed on one occasions at the end of Year 11.

Assessment guidance in detail

External assessment set and marked by Pearson, completed under supervised conditions. The assessment will be completed in 1.5 hours within the period timetabled by Pearson. 60 marks. Construction Technology requires learners to understand the different areas of technology and the real-life application of these technologies in the UK and around the world.

The design of this external assessment ensures that there is sufficient stretch and challenge. It is based on a key tasks that requires learners to demonstrate they can identify and use effectively an appropriate selection of skills, techniques, concepts, theories and knowledge.

Assessment objectives

AO1 Demonstrate knowledge of work of the construction industry and the different technology used in low-rise construction projects.

AO2 Demonstrate understanding of work of the construction industry and the different technology used in low-rise construction projects.

A03 Be able to make connections between different construction technologies to ensure appropriateness of low-rise construction projects in different scenarios.

Unit 1 interlinks with all other units performed and forms a base for a wider set of knowledge and skills that will have an element of retrieval activities set until the end of year 11. Printed *Knowledge Organisers* and *Unit 1 Booklets* have been issued to the learners, but an extra copy can be obtained at any time by logging onto class charts viewing the **HOMEWORK section of Year 10 + 11.**

Based on past papers there will be a set of questions handed to the learners that are like those set in the exam. These topics are revised in school lessons as well as set as homework tasks and on Google Classroom.

Design and Technology

There is 1 examination paper in the summer. This paper is worth 50% of the total marks for the course (100 marks).

The examination is broken down into 2 sections: Core section: 40 marks Specialist material area Textiles: 60 marks

Exam Date - Mon 18th June 2024

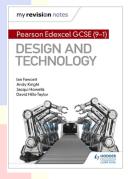

1 hr 45 mins

Revision

All students will have a copy of 'My Revision Notes: Pearson Edexcel GCSE (9-1) Design and Technology.

They can use this to:

- Plan and manage a successful revision programme using the topic-by-topic planner
- Consolidate subject knowledge by working through clear and focused content coverage

- Test understanding and identify areas for improvement with regular 'Now Test Yourself' tasks and answers

- Improve exam technique through practice questions, expert tips and examples of typical mistakes to avoid

- Get exam ready with extra quick quizzes and answers to the practice questions available online.

Revision techniques

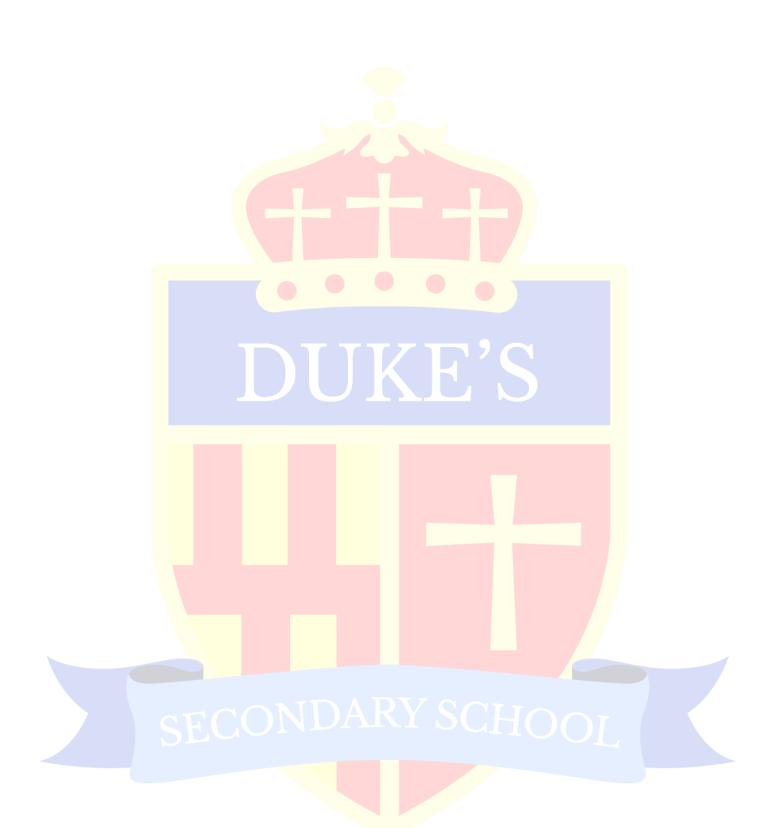

As well as the revision guides, students can access additional revision and tests on

- Edexcel Design and Technology
- <u>https://www.bbc.co.uk/bitesize/examspecs/zb6h92p</u> Other good revision sites include:
- Technologystudent.com
- <u>WWW.Mr-DT.com</u>

Additional Support

Mrs Clark and Mrs Walker are available on Tuesday after school to answer questions and give advice/support.

Friday option 3 tutor time can also be used to support revision in the run up to the exam.

Enterprise

Students have one externally set task which counts towards the final mark for the qualification. The external assessment comprises 40 per cent of the total GLH of the qualification and is weighted accordingly in the calculation of the overall qualification grade.

The external assessment is for Component 3 Marketing and Finance for Enterprise and will test students' understanding and skills in the unit topic areas. The date of Component 3 Marketing and Finance for Enterprise exam is 8th May 2024. The exam is 2 hours in length.

This component requires learners to analyse and interpret information in relation to an enterprise and to make recommendations on strategies to use to improve the performance of that enterprise.

The design of this external assessment ensures that there is sufficient stretch and challenge, enabling the assessment of knowledge and understanding at the end of the learning period.

The external assessment is based on a written assessment that requires learners to demonstrate that they can identify and use effectively an appropriate selection of skills, techniques, concepts, theories and knowledge from across the whole qualification in an integrated way. It focuses on the following assessment objectives:

Assessment objectives

AO1 Demonstrate knowledge of facts, terms and issues in relation to enterprise

AO2 Demonstrate an understanding of facts, terms and issues in relation to enterprise

AO3 Apply an understanding of facts, terms and issues in relation to enterprise

AO4 Make connections with concepts, issues and terms in enterprise

AO5 Carry out calculations to complete financial documents, carry out calculations using formulae and ratios, and construct and interpret break-even charts

Revision Strategies

There are plenty of revision activities that students can work through. Many retrieval quizzes can be used to aid revision.

Students have access to all learning PowerPoints which are shared on Google Classroom.

There are Knowledge Organisers which can be used for each topic area of the exam.

Students have access to past papers, mark schemes, examiners report to work through.

Travel and Tourism

Students have one externally set task which counts towards the final mark for the qualification. The external assessment comprises 40 per cent of the total GLH of the qualification and is weighted accordingly in the calculation of the overall qualification grade.

Component 1 Travel and Tourism Organisations and Destinations	30% of the course, teacher assessed.			
Component 2 Customer Needs in Travel and Tourism	30% of the course, teacher assessed			
Component 3 Influences on Global Travel and Tourism	40% External assessment (exam).			

The external assessment is for Component 3 Influences on Global Travel and Tourism and will test students' understanding and skills in the unit topic areas. This is based on a context that requires students to demonstrate that they can identify and use effectively an appropriate selection of skills, techniques, concepts, theories and knowledge from across the whole qualification in an integrated way.

The exam is 2 hours in length. It will be worth a total of 60 marks. There will be questions worth 1 mark going up to 6 mark questions.

The assessment objectives for the examined unit cover the following areas:

A Factors that influence global travel and tourism

- A1 Factors influencing global travel and tourism
- B Impact of travel and tourism and sustainability
- B1 Possible impacts of tourism
- B3 Managing sociocultural impacts
- B5 Managing environmental impacts

C Destination management

- C1 Tourism development
- C2 The role of local and national governments in tourism development
- C3 The importance of partnerships in destination management

There are plenty of revision activities that students can work through.

Students have access to all learning PowerPoints which are shared in Google classroom in the classroom section. All students know how to access this area as we use it in lesson time.

Students can use symbols and images used in power points to help with dual coding when revising. This will be in lessons specifically for Component 3 the examined unit.

A2 Response to factors

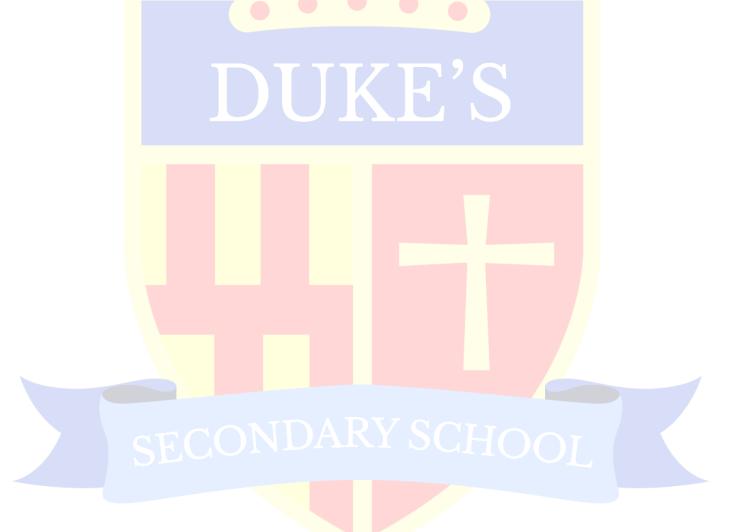

B2 Sustainable tourism B4 Managing economic impacts There are Knowledge Organisers which can be used for each topic area of the exam. These are also found in the google classroom but students will be given hard copies to take home.

Students are given the key command verbs that are used in the exam, and they also have questions that check understanding and therefore get them to focus on the areas needed when revising.

Marked mock papers will be given back to students to help support with revision. As well as copies of old exam papers to practise as part of revision.

Students can attend a targeted revision session after school. We also often hold sessions in the holidays to complete extra revision.

Students can contact travel staff at any time in google classroom or via school email.

Drama

Below is a checklist of work and strategies that all Drama students can employ to be well prepared for the practical element of the examination.

- Make efficient use of rehearsal time experimenting with a range of voice and movement ideas.
- Make use of what you have learnt during the course about how to use key drama elements to engage the audience.
- Look forward to the practical examination and appreciate that it is an opportunity to share your work with others.
- Work to a production plan which makes full use of the plenary part of every lesson to reflect on progress and set action points for subsequent rehearsals.
- Understand what is expected of you individually so that you can work independently in between rehearsals.
- In rehearsals observe carefully and concentrate fully so that you can give and receive constructive advice.
- Be prepared to learn from others and make effective use of constructive advice given to you by others.
- In devised theatre employ a range of drama devices which explore significant issues.
- Write and deliver thought-provoking dialogue which communicates your chosen themes.
- In performance, control and vary the pace delivery, thinking how to highlight key moments.
- Make varied and intelligent use of the acting space to engage the audience.
- Modulate and project your voice with clarity and precision to communicate the dialogue.
- Think carefully about the technical aspects of your performance and use costume imaginatively to communicate aspects of character.
- Plan the transitions between the scenes and use set and lighting creatively to ensure pace and control.
- Stay positive and focused, maintaining a willingness to experiment until happy with the outcome.
- Make sure you have a technical and dress rehearsal so that you are fully prepared for the practical examination and feel confident about doing well.
- Delight the audience with your energy and enthusiasm.
- Students are invited to attend additional after school rehearsals in order to get detailed, personal feedback on their individual performances.

Music

Your course is the 9-1 GCSE in Music. Your examination board is EDUQAS.

Component 1 Performing	30% of the course, teacher assessed
Component 2 Composition	30% of the course, teacher assessed
Component 3 Listening	40% of the course, externally assessed

The main focus of your revision should be preparation for the Listening exam. You need to cover the four areas of study;

AoS1 - Musical Forms and Devices (Including set work: Badinerie by J.S.Bach)

AoS2 - Music for Ensemble

AoS3 - Film Music

AoS4 - Popular Music (Including set work: Africa by Toto)

What to revise, and ways to do it.

You will be given a resource pack which includes a revision checklist, basic music theory and vocabulary and key words.

Focus on Sound - this is your main revision source. You can log in using your school Google account but if you have any issues please see Mr Fender or Mr Thompson.

Eduqas Website - https://www.eduqas.co.uk/qualifications/music/gcse/ Select 'Digital Resources' for access to lots of useful guides etc.

Eduqas Exam Guidance - Eduqas has created a presentation taking you through what to expect in the exam. Copies of this are available on Google Classroom

Listening Homeworks - you all have copies of these and more will be placed on Google Classroom

Google Classroom - this will become increasingly important the nearer to your examination you get, as I will be outlining revision plans using it, as well as sharing extra resources.

Youtube - search Eduqas GCSE Music, there's *loads* of helpful videos on there.

BBC Bitesize also covers the course: https://www.bbc.co.uk/bitesize/examspecs/zbmct39

Physical Education

Access OCR website for past papers and mark schemes.

Your class teacher will provide you with a list of key words and their meanings. Try to learn them all.

On Google Classroom you will find past papers, as well as revision notes on a variety of topics

Revision Classes

Revision classes will be arranged in the run up to the exam season.

You can borrow a revision guide which includes help with every topic covered, See your class teacher for this.

Tips for Productive work and revision

- Check all your work is up to date.
- Ask for any information you don't have in your files or workbook.
- Practise as many different types of questions as you can.
- Don't be shy! If there is anything that you are not sure of or need help with ask your teacher.
 Chances are you will not be the only one.
- Go through all of your work and make notes on your notes.
- Use a variety of techniques to help you cover all your work;
- o spider diagrams o power points
 - o blin<mark>d reveal</mark>
- http://www.bbc.co.uk/schools/gcsebitesize/pe/
- <u>www.senecalearning.com</u>
- www.ocr.org.uk _once on this site follow the links to PE and access past papers and exam tips.

The GCSE Exam

- PAPER 1 (30%): THE HUMAN BODY AND MOVEMENT IN PHYSICAL ACTIVITY AND SPORT
- PAPER 2 (30%): SOCIO-CULTURAL INFLUENCES AND WELL-BEING IN PHYSICAL ACTIVITY AND SPORT
- Both papers include multiple choice, short and long answer questions
- Coursework
- PRACTICAL (40%): one team sport/one individual sport/plus one other team or individual sport and in addition an analysis of performance for one sport.

BTEC Sport

In order for students to achieve their desired grade in BTEC Tech Award in Sport, they must revise little and often. External assessment set and marked by Pearson and completed under supervised conditions. The assessment will be completed in **1.5 hours** within the period timetabled by Pearson. The assessment has a total of **60 marks**.

The students will be entered into the May/June Assessment window.

The one external assessment is **Component 3: Developing Fitness to Improve Other Participants Performance in Sport and Physical Activity.** This provides the main synoptic assessment for the qualification and requires learners to use theoretical knowledge and understanding of applied anatomy and physiology, movement analysis and physical training so that they can use this knowledge to analyse and evaluate performance and devise informed strategies for improving/optimising their own practical performance.

The design of this external assessment ensures that there is sufficient stretch and challenge, enabling the assessment of knowledge and understanding at the end of the learning period.

The external assessment is based on a *written assessment* that require learners to demonstrate that they can identify and use effectively an appropriate selection of skills, techniques, concepts, theories and knowledge from across the whole qualification in an integrated way.

Students can achieve a Level 1 Pass, Level 1 Merit, Level 1 Distinction. Level 2 Pass, Level 2 Merit or a Level 2 Distinction. Learners who do not achieve the standard required for a Level 1 Pass will receive a uniform mark in the range 0–35.

Revision Resources

Homework: All Y11 students will be given regular homework tasks when component 3 begins. Completing these to the best of your ability and seeking help with tricky questions is a key component of revising effectively. Make sure you do!

Lessons: We have access to Pearson ActiveLearn Digital Service which helps bolster the resources available to students. A range of activity worksheets, videos and interactive online quizzes will help students expand their knowledge further in lessons.

Google Classroom: Knowledge organisers are on *Google Classroom* account, including links to online lessons and revision sites.

Revision workbooks: Every student will be given a "Pearson Revise BTEC Tech Award Sport Revision Guide". This will enable students to:

- Revise all the essential content and key skills
- Organise your revision with the one-topic-per-page format
- Speed up your revision with the helpful hints on how to tackle questions and tasks

DUKE'S

- Track your revision progress with at-a-glance check boxes
- Check your understanding with annotated example responses
- Practise with revision questions and answers.

Health and Social Care

The examined element of this course (R032) in which students sit a one hour 15 minute paper, is based on the principles of care in health and social care settings and is worth 40% of the final mark.

All IT students have revision notes, past exam papers and an exam board endorsed revision book to guide them through the questions they will be faced with.

Recommended revision techniques

Allocate 15 – 20 minute blocks to learning particular topic areas e.g. Predicted and unpredicted life events. You should be able to stay motivated and engaged for this length of time!

Stick post it notes around your bedroom of key words or phrases to help you memorise them e.g. the definition of domiciliary care

Use visual prompts such as creating a mind map to cover a particular topic e.g. Types of social care settings

Use the guided questions in your revision book to practise structuring answers for a 10 mark question

• Try revising with a friend using flash cards. Give them a topic and ask them to tell you everything they know about it!

• Although using computers and other forms of ICT can be useful, your exam will be written so try having a digital detox for some of your revision sessions.

SECONDARY SCHOO

Cambridge National in IT

The examined element of this course (R050) in which students sit a one hour 15 minute paper, is based on the principles of using IT in the digital world.

In this unit students learn about design and testing concepts for creating an IT solution or product, and the uses of IT in the digital world. Topics include:

o Design Tools

o Human Computer Interface (HCI) in everyday life

o Data and testing

- o Cyber-security and legislation
- o Digital Communications

o Internet of Everything (IoE).

Everything students need to help them prepare for their exam is in their Google Classroom (GC); however, the main thing they need to use is their revision guide book. All students have a printed copy and there is also a digital copy on the GC.

Revising for the Cambridge Nationals in IT exam requires a strategic approach to cover the key topics and develop a solid understanding of the subject. Here are some general tips for students to help prepare effectively:

Understand the Exam Structure:

- Familiarise yourself with the exam format, including the types of questions, time allocation, and any practical components.
- Print past papers and mark schemes to get a sense of the style and difficulty of questions (these are on your google classroom).

Create a Study Plan:

- Break down the content into manageable sections and create a study plan. Allocate specific time slots for each topic to ensure comprehensive coverage.
- Prioritise topics based on your confidence level and the weight of each topic in the exam.

Practice Regularly:

 Practice is crucial for IT exams. Engage in regular revision sessions and attempt past papers under exam conditions to improve time management.

Focus on both theoretical understanding and practical application.

Review and Learn from Mistakes:

• After completing practice papers, review your answers and understand where you went wrong. Learn from your mistakes to avoid repeating them in the actual exam.

• Take note of common themes and recurring concepts that appear in different papers. Collaborate and Discuss:

 If possible, form study groups with classmates or seek help from teachers. Discussing concepts with others can deepen your understanding and provide different perspectives.

Create Revision Notes:

• Summarise key concepts, formulas, and important information in concise revision notes. Use visual aids, charts, and diagrams to help you remember key points.

Use Online Resources:

• Use the online resources which are linked in your google classroom. Take Breaks:

• Ensure that you take regular breaks during study sessions to avoid burnout. Taking breaks can actually improve focus and retention.

Remember, effective revision is not just about memorising facts but understanding the underlying concepts and being able to apply them. Tailor your approach to your learning style, and don't hesitate to seek guidance from your IT teacher or Miss Hart if you encounter challenges with specific topics. Good luck!

DUKE'

Revision Timetable Term Time (Example)
