2D Shapes

Task One: This week we have been looking at 2D shapes and we have been concentrating on the shapes *circle, rectangle, triangle and square.*

This week we hope you have lots of fun together by going on a shape hunt either around your house or around your local area. Please upload any photos of your adventure together on to Tapestry. We hope you have lots of fun being a 'Shape Detective!'

Task Two/Challenge: Can you create a 2D shape picture? You could draw this and label the shapes you used or you could find objects and put them together to create your own picture. Remember only use 2D shapes for this. Please find a few examples below.

Please return your homework folder on Wednesday 21st October
