

Magnificent Mini beasts

Our first topic this term is a non-fiction topic all about the creatures we see in our outdoor environment. We will be learning about their habitats, features and how to look after them. Our class books will be focused on both non-fiction and fiction texts to learn about how they impact on our wonderful world.

Religious Education

As we return from the Easter break, we will be celebrating the good news! We will be reading the happiest day and learning about Jesus' good news. We will also focus on our own good news and the story of pentecost. As we move through the term our next topic will be Friends. We will be learning about how to be a good friend and the importance of saying sorry. Our final topic will be Our World. In this topic we thank God for his wonderful creations and wonder about the world we live in.

Transition

During our summer term, we work hard to help our children to understand their next steps in their school journey. From both nursery to reception and reception to Year 1. We will be ensuring that the children become familiar with the adults in their new phases.

Class 1 Curriculum Newsletter Summer

Summer

During the summer months we ensure we spend lots of time enjoying the sunshine using our amazing school grounds. We will be getting ready for sports day outside as our PE lessons move outside.

As we enjoy the sunshine we will be learning about keeping safe whilst being outside and how the weather changes.

Pirates

We will be letting our imagination run wild during our pirates topic. Building ships, reading pirate fantasy stories and making treasure maps.

Phonics

We will be following the Little Wandle phonic scheme. Nursery children will be building a good foundation for phonics through sounds, rhyme and oral segmenting. Reception children will be learning to recognise and hear sounds in the words we read and write. We will be continuing to recap phase 3 sounds and introducing the children to phase 4 words, with consonant blends. We will be continuing group reading and preparing the children for their next steps.

Maths

We use the NCETM Mastery of Maths approach. Children this term will continue to develop and practise their subitising skills, learn about patterns they see in numbers, explore the composition of numbers to 10 and build upon their current counting strategies. For our shape, space and measure curriculum children will be looking at more complex patterns, measuring in the areas and looking at both 2D and 3D shapes.

Little People, Big Dreams

To develop children's understanding of the past and present we will be looking at a range of the Little People, Big Dreams books. This term we will focus on David Attenborough and Greta Thunberg.
