18th September 2019

Dear Parents

A warm welcome to our annual Post 16 Opportunities Evening. Making decisions as to what to do at post 16 level is never easy and the purpose of this evening is to assist in this decision making process.

The law has changed regarding the school leaving age. Students must continue in education or training until the end of the school year in which they turn 18. You can continue your education or training at a college, with a specialist provider or in a workplace.

Please take time to visit all the further education establishments and other organisations represented here this evening. There will be plenty of opportunity to talk with representatives and to pick up relevant brochures and literature. Enclosed within this booklet is a list of open evenings for local further education colleges and schools. It is strongly recommended that you attend as many of these as you can, to help make an informed choice about post 16 destinations.

Many colleges now operate an online applications facility via their individual websites. Applications to colleges using paper forms are dealt with by the school. Please note deadlines for submission of applications, which are included within this booklet, as it is important that all deadlines are met.

Please feel free to pop into reception if you require assistance with completing application forms, to discuss course choices or anything college/career related. Mrs Ferros will be carrying out careers interviews with all Y11 students during October and November

If you are planning a summer holiday, please be aware that students are required to be available soon after the GCSE exam results are issued on 20th August 2020, as colleges hold taster days, interviews and enrolment sessions before the beginning of the autumn term.

We hope that you have an enjoyable and informative evening.

Yours sincerely

Mrs F Hatchard
Assistant Headteacher

Mrs Isley
Vocational Manager

Mrs K Ferros
Careers Adviser

Colleges and Organisations attending the post 16 Opportunities Evening

West Sussex

Collyer's Sixth Form College

CHRIST'S HOSPITAL Horsham RH13 0YP Tel: 01403 246555 www.christs-hospital.org.uk	Saturday 14 th September 2019: Book a place online
HURSTPIERPOINT COLLEGE College Lane, Hurstpierpoint BN6 9JS Tel: 01273 833636 www.hppc.co.uk	Saturday 21 st September 2019: Open Morning Saturday 5 th October 2019: Sixth Form Only
ROEDEAN SCHOOL Roedean Way, Brighton BN2 5RQ Tel: 01273 667500 www.roedean.co.uk	Saturday 5 th October 2019: 9.00am - 1.00pm
WORTH SCHOOL Paddockhurst Road, Turners Hill RH10 4SD Tel: 01342 710200 www.worthschool.org.uk	Saturday 12 th October 2019: 10.15am Saturday 9 th November 2019: 10.15am

Places can be booked by either visiting the schools/colleges' websites and registering to attend online, or by contacting the admissions office.

Processing of college applications

Below you will find information concerning applications to colleges. It is imperative that deadlines are strictly adhered to; otherwise it cannot be guaranteed your application will be processed on time. *(This information does not apply to independent sixth form applications.)*

It is suggested that students should apply to more than one college. A decision about which college to attend can be made after your interviews.

PLEASE NOTE:

You can apply to both BHASVIC and Varndean, however you must choose one or the other of these two sixth form colleges as your first choice to make your application and the other as second if these are your choices.

Students considering an Apprenticeship are advised to make a college application as a back-up measure. It is easier to decline a place at college than to apply late if you are unable to secure apprenticeship training.

PAPER APPLICATIONS DEADLINE

Monday 25th November 2019

ONLINE APPLICATIONS DEADLINE

Friday 6th December 2019

Paper Applications - please do not send directly to colleges

All application forms must be handed to Mrs Ferros in Reception by Monday 25th November 2019. She will arrange for references and grades to be included and will deliver applications to colleges.

Application forms should be completed neatly in BLACK pen – make a photocopy and practice first if necessary.

Online Applications

These must be submitted to colleges by Friday 6th December 2019. You may still be able to apply after this date but priority is given to applications received by the deadline. Colleges will then request references from the school.

School Contact Information

When completing your applications, you will be asked to give the name of the person at Oathall for the colleges to contact to request your school reference and predicted exam grades. This is Mrs K Ferros, Careers Adviser - email: kferros@oathall.org

College Interviews

Interviews take place from December to April. You will be contacted directly, often by email or text, with details of your interview so it is very important that you provide your mobile number and an email address that you use and check regularly.

If studying an Art / Photography subject, students will be required to take a portfolio of evidence with them.

If students have chosen Dance / Performing Arts they will be expected to attend an audition.

What next?

- Look at the displays this evening and collect information
- Go to the colleges' open evenings
- Refer to the colleges' websites for up-to-date course information, as prospectuses are printed some time before and details do change
- UCAS now provides a database of all post-16 courses. The website can be accessed at www.ucasprogress.com
- Look at the careers websites listed in this booklet and on our website
- Encourage your son or daughter to talk to:
 - teachers
 - careers advisers
 - friends
 - current students
 - you

to help them choose the college / option that is right for them!

Factors to consider when making subject and college choices

Courses	<p>Not all courses are available at all colleges so make sure you check what each college has to offer.</p> <p>Some courses have specific entry requirements and these can vary between colleges, e.g. to study Psychology you may need GCSE science at grade 6 and English at grade 6.</p> <p>Look carefully at the modules within a course. These can vary considerably at different colleges.</p> <p>Look at how the course is assessed, e.g. most A levels are 100% examination, whereas Vocational Qualifications including BTECs, Cambridge Nationals etc include a practical element and coursework.</p> <p>You are more likely to succeed if your choices fit your interests and abilities.</p> <p>If you have no career in mind – try to choose a range of subjects in order to keep your options open.</p>
Progression	<p>Is this the right course or combination of courses to meet the entrance requirements for the subject you wish to study at university? E.g. to study medicine you must have A level Chemistry. The UCAS website is very useful for researching this www.ucas.com</p>
Facilities	<p>What else does the college offer to support learning?</p> <p>What extra-curricular activities do they provide?</p>
Quality	<p>Results - look at the individual subject pass rates for the subjects you are interested in studying, not just the overall results for the whole college.</p>
Travelling	<p>Can you get there? Consider the cost. Be realistic.</p>
‘Feel’/ethos	<p>Do you like it?</p>
Guidance	<p>Do they offer careers support and guidance for university applications or your chosen next step?</p>

Oathall Support and Guidance

- Post 16 Opportunities Evening
- Preparing for the World of Work lessons
- One to one Careers interviews during October & November
- Advice and assistance with college applications including college references
- Provision of impartial and independent careers guidance via the 'kudos' online program
- Careers staff are always on hand to answer queries
- Check Google Classroom "Work Related Learning Y11" for the latest information and notices

Careers Adviser: Mrs K Ferros

kferros@oathall.org

Come and see me in Reception - I'm here to help you

Understanding Qualifications

What level should you choose?

The qualification level shows how demanding the course is going to be – the higher the level, the more difficult the qualification. There are nine levels, ranging from Entry level up to level 8. Every level includes different types of qualifications. Some are subject based, e.g. A levels. Some are vocational (work and job related), e.g. BTECs, City and Guilds, Apprenticeships.

Students work at the level that suits their abilities and experience in a particular subject. Once you have gained a qualification at one level, you can move up to the next level. When deciding what level to study after Year 11, you need to consider:

- Your starting point – what level are you working at now?
- The end point – can you move on to higher level qualifications?
- Job entry requirements – most jobs require level 2 qualifications and many ask for qualifications at level 3 and above.
- Higher Education entry requirements – most courses require level 3 qualifications and a grade 4 or above in GCSE English language and mathematics.
- Apprenticeships start from level 2 and are available up to degree level (level 4 and above).

QUALIFICATION LEVELS

Level	University			
8	Doctorate PhD			
7	Master's Degree MA, Msc, MPhil			
6	University Degree BA, BSc	Foundation Degree FdA, FdSc		
5			HND	
4			HNC	
3	A Level	L3 Extended Diploma (National Diploma)	L3 Diploma (National Certificate)	T Level
2	GCSE Grades 9-4	L2 Diploma (1 st Diploma)		
1	GCSE Grades 3-1	L1 Diploma (Foundation)		
Entry Level 3	Key Stage 3	E3 Diploma (Foundation)		
	School/ 6 th Form	FE College		

Options at 16+

The Full Time Education Path at Post 16

It is now a legal requirement for all students to continue in education or training until the end of the school year in which they turn 18. You can continue your education or training at a college, with a specialist provider or in a workplace.

The post 16 qualifications framework encourages young people to choose a broader curriculum. This means that there are now more options available in full time education than ever before.

- Academic A levels
- Courses leading to other qualifications such as the International Baccalaureate, NVQs, BTECs, City & Guilds
- Additional GCSEs or re-takes

A Levels (Level 3 Qualification)

- Typically a student will study three A levels and will need to gain five 9-4 grades at GCSE, including English and Maths. Students achieving mostly 9-8 grades at GCSE may be able to take four A levels.
- Most A levels (with the exception of Art & Design courses) will be assessed by 100% examination. Science courses will include a practical assessment.
- A levels can be taken in conjunction with other courses, e.g. BTECs.
- A levels are graded A* - E and score points which count towards university entrance.

T Levels (Level 3 Qualification)

T Levels are new courses coming in September 2020, which will follow GCSEs and will be equivalent to 3 A Levels. These 2-year courses have been developed in collaboration with employers and businesses so that the content meets the needs of industry and prepares students for work.

T Levels will offer students a mixture of classroom learning and 'on-the-job' experience during an industry placement of at least 315 hours (approximately 45 days). They will provide the knowledge and experience needed to open the door into skilled employment, further study or a higher apprenticeship. For further information visit: www.gov.uk/government/publications/introductions-of-t-levels

BTEC Qualifications (Levels 2 and 3)

BTEC qualifications are specialist vocational qualifications valued by industry and higher education alike. They encourage and stimulate student achievement through innovative learning and assessment styles, by focusing on the applied knowledge and understanding of the specific sectors, e.g. Business, Health & Social Care, IT, Sport, Public Services, Performing Arts, Media.

- Available at levels 2 and 3. If you plan to move from level 2 to level 3, you need to ensure you have sufficient units to be able to progress on to the higher level.
- Designed to industry standards.
- There are three “sizes” of BTEC: Certificate, Extended Certificate and Diploma (Subsidiary Diploma and Extended Diploma), and are equivalent to one, two or three A levels.
- All units and the overall qualification will be awarded a mark of Pass, Merit or Distinction.
- A period of work experience or day release can be part of the course.
- Level 3 BTECs in relevant subject areas meet many universities’ entry requirements, especially if studied alongside academic A levels. Check these on www.ucas.com

Students work individually and as part of a team. They need to have a commitment to and an interest in a specific area of work. During the course a portfolio of work is prepared as evidence. Ideal for those who prefer continual assessment and enjoy coursework.

International Baccalaureate (IB) (Level 3 Qualification)

The International Baccalaureate is only offered at Varndean College (but also available at independent sixth forms). It is internationally recognised and understood by universities and employers as an excellent preparation for further study and employment. This stand-alone course is a rigorous and challenging alternative to A levels, studied over two years, and is broadly equivalent to four A levels. It gives a very broad based learning and is good for students who are not sure which career path they want to travel.

To gain this qualification you must:

- Study six subjects from the subject groups of language, second language, individuals and societies, mathematics and computer science, the arts, and experimental sciences.
- Complete an extended essay, having researched and investigated a topic of special interest.
- Follow a “theory of knowledge” course.
- Participate in creativity, action and service projects.

You need to be organised, have a strong interest in broad areas of study and activities and be able to cope with ongoing assessment as well as exams.

As with all qualifications, you should check carefully with individual institutions for exact entry requirements, but generally at least six GCSEs are required at grades 9-6 including English, Maths and Science. (For some specialist degree courses such as medicine at top universities, A levels are preferred. You should check university entry requirements to ensure that the IB is accepted for the course you may wish to study.)

Extended Project Qualification (EPQ) (Level 3 Qualification)

If you are aiming to study at a top university, you should seriously consider taking the Extended Project Qualification in your second year. Universities value the EPQ as a preparation for higher level study. It involves independently researching and writing a 6,000 word dissertation on a chosen topic that fits with your studies or one that is of personal interest. Equivalent to half an A level.

General Considerations

Colleges require a minimum of five GCSEs at grades 9-4 for a three A level programme (these must include English and Maths). Many courses require a minimum of five GCSEs at grade 6. To take certain subjects at A level, e.g. Maths, Sciences, Languages, a student would be expected to gain at least a grade 6 at GCSE in that subject.

Not all courses are available in every college and students need to find out for themselves what each college has on offer.

In deciding which subjects to take, students must give careful thought as to what they want to do afterwards: some higher level courses or employment opportunities require particular subjects, studied at particular levels, e.g. to become a doctor you will need to study Chemistry at A level.

Level 2 Courses

It is now a statutory requirement that all students are required to retake GCSE Maths and English Language if they do not attain a minimum of grade 4 in Year 11. These retakes can be taken alongside A levels / BTECs if other entry requirements are met, or alongside a Level 2 programme of study. Students can then progress to Level 3 courses the following year.

Foundation Learning

These are Entry level and level 1 programmes. These courses include three distinct components:

- Vocational qualifications
- Functional skills (English, Maths, ICT)
- Personal and Social Development (PSD) qualifications

Dependent on which college you go to, vocational taster choices are offered in a variety of subjects, e.g. art, beauty, business, catering, childcare, construction, media, engineering, IT, motor vehicle, photography.

Foundation Learning programmes are designed for students who have, for various reasons, had limited achievement at school. They are designed to promote progression to level 2 study and/or employment, as well as helping students to achieve nationally recognised qualifications at Entry level and level 1.

Functional Skills

These are practical skills in English, Maths and ICT which allow individuals to work confidently, effectively and independently in life. They are available as stand-alone qualifications and also feature within the qualification routes for Apprenticeships and Foundation Learning.

Moving on to University

It is important to note that if a student is thinking of going to university, most require that a student takes three full A levels. There are also level 3 vocational courses, e.g. BTECs, which can lead to higher education.

Your choice of A level and BTEC subjects can have a significant impact on the course options available to you at university. You need to be aware of the likely entry requirements, in terms of both the grades you need to achieve and the actual subjects you study. Many universities are now more specific about the qualifications they expect of their applicants.

- If you have **already decided on a course** that you would like to study at university, we recommend that you take a close look at the course requirements at a number of universities before you finalise your subject choices, to check that your A levels / BTECs will be suitable for your application.
- If you have **not yet decided on a course** that you would like to study at university, we recommend that you select subjects to maximise your potential course choice. Certain A level subjects are considered either essential or useful for a number of degree courses, so choosing one or more of these will help you keep your higher education options open.
- Whether or not you have an idea of the course you want to study at university, having the right information now will give you more options when the time comes to make your mind up. We recommend that you take a look at the **'Russell Group: Informed Choices'** guidance, which includes advice on the best subject combinations for a wide range of university courses: <http://russellgroup.ac.uk/informed-choices>

Research must also be carried out if students are considering taking professional courses where certain subjects should be studied at A level to enable entry onto these degree courses. For example, to study Medicine, A level Chemistry is usually essential, plus at least one from Biology, Maths and Physics. However, admissions criteria for each Medical School vary and do need to be checked individually.

You can easily find out a good deal from the universities' own websites, which can be accessed either directly or via the central UCAS (Universities and Colleges Admissions Service) website www.ucas.com

As universities are now becoming more transparent about what they are looking for, applicants need to make sure that they are better informed at an earlier stage. Although maximising your grades at GCSE next summer is obviously the current top priority, spending some time looking very closely at university requirements may also turn out to be time well spent.

If you require further guidance please see Mrs Ferros, our careers adviser.

The Employment Options at Post 16 (work based learning)

This option suits students who know what they want to do for a living. You can leave school and find employment with work based training, e.g. NVQs, Apprenticeships, Traineeships.

National Vocational Qualifications (NVQs) (Levels 1 - 5)

- Level 2 equivalent to GCSEs, level 3 equivalent to A levels
- Practical, skills based courses usually taken once in a job, in areas such as Hairdressing, Catering, Childcare, Animal Care, Construction trades and Motor Vehicle Engineering.
- Some colleges make it possible for students to work towards NVQs while based in full time education. Students should refer directly to college prospectuses for more information.
- You need to have a strong interest in a specific area of work, be self-motivated, able to work by yourself and also as part of a team.
- Assessment is through coursework.

Apprenticeships

Apprenticeships take between one and five years to complete and cover 1,500 job roles in a wide range of industries, e.g. Accountancy, Business Administration, Animal Care, Catering, Construction, Customer Service, Engineering, Hairdressing, Health & Social Care, IT, Motor Industry, Retail, Telecommunications and many more. Apprenticeships are now available up to degree level and beyond.

Intermediate Apprenticeship (Level 2)

- Entry requirements vary. Some require specific qualifications such as GCSEs in Maths and English at grade 4 or above. Others require you to pass an initial assessment.
- Trainees will be paid a training wage and work towards qualifications in NVQs, Functional Skills and Technical Certificates.
- Usually takes one year to gain a level 2 (equivalent to five GCSEs grades 9-4) after which it should be possible to progress to level 3.
- Training may take place solely in the workplace or on day release courses at college.

Advanced Apprenticeship (Level 3)

- Equivalent to at least two A levels.
- For 16+ year olds who have gained a minimum of five GCSEs at grades 9-4.
- Trainees will be paid a training wage and work towards qualifications in NVQs, Functional Skills and Technical Certificates.
- Training may take place solely in the workplace or on day release courses at college.
- Usually takes two years to complete and it is possible to progress to a Foundation Degree at university.

Higher Apprenticeships (Level 4 and above)

Higher Apprenticeships offer ambitious existing apprentices and employees, as well as A level school leavers, a different route to traditional university study. There are more than 40 Higher Apprenticeships to choose from and apprenticeships at degree level are now available. Occupational areas include Accounting, Advertising & Marketing, Banking, Business, Construction, Engineering, Fashion & Textiles, Hospitality, IT & Web Professionals, Legal Services, Life Sciences; with many more in development.

How to Apply for Apprenticeships

Visit www.gov.uk/apply-apprenticeship to register, search and apply for apprenticeship positions nationwide.

You can also look at local apprenticeship providers' websites to find apprenticeship opportunities in our area. Examples of these are:

www.apprenticeships-in-sussex.com/

www.rewardstraining.co.uk

www.jace-training.co.uk

www.sigta.co.uk

www.stevewillis.com

You can also approach local employers in your chosen sector to enquire about possible apprenticeship opportunities.

WOULD YOU LIKE HELP?

Students need to be proactive in arranging their own apprenticeship place but if you would like any further information, or help with registering and applying for vacancies, Mrs Ferros will be only too happy to help.

Remember ...

Students considering an apprenticeship should also, as a back-up measure, make a college application for a full-time course in the area you are interested in. If you do not find a job before the start of the college year you should start on the full-time course. If at any time during the full-time course you manage to find a suitable job, you can be transferred on to the apprenticeship programme subject to various conditions being met by your employer.

Traineeships

A traineeship is a course with work experience that gets you ready for work or an apprenticeship. It can last up to 6 months.

You can apply if you're:

- eligible to work in England
- unemployed and have little or no work experience
- aged 16 to 24 and qualified below Level 3

You may be ready for an [apprenticeship](#) if you already have some work experience.

You'll get:

- a work experience placement
- help with English and maths (if you need it)

You won't be paid, but you may be given expenses for things like travel and meals.

Visit www.gov.uk/find-traineeship to register and apply for Traineeships, or contact local colleges and training providers to find out if they are offering Traineeship opportunities.

At Oathall we provide students with a comprehensive careers program. This provides students with information on the options available to them after they leave Oathall.

Career planning is an ongoing process. We support students by giving them the most up-to-date advice about work. We also support them in their choices and applications to Sixth form college and further education. We encourage students to conduct their own career research and provide students with careers advice. Students are also supported by tutors, subject teachers, Heads of House and pastoral staff over their career choices.

Mrs Ferros is our professional careers adviser based in the college. Students can email her or see her in person. She can be emailed at kferros@oathall.org or contacted by phone on 01444 414001.

A parent's guide to apprenticeships

As a parent, you want your child to get the best possible start in their career. There are many options available to young people after they leave school, and in this guide, we outline information and benefits about apprenticeships as a key route into a successful career.

What's an apprenticeship? It is a genuine job, with training, meaning you can earn while you learn and gain a nationally recognised qualification.

What are the benefits?

Apprenticeships are now available up to degree level and beyond. Over 70 national universities are currently offering a range of degree apprenticeships with more to be confirmed throughout the year.

- Earning a salary and paid holiday;
- Excellent progression opportunities, whether looking to study further or climb the ranks within the workplace;
- Increased future earning potential – apprentices enjoy marked salary increases on finishing their training and those completing a higher apprenticeship could see increased earnings of an estimated £150,000 over their lifetime.*

What levels are there?

There are various levels of apprenticeship to apply for depending on current skills and qualifications. Apprenticeships have equivalent educational levels:

Name	Level	Equivalent educational level
Intermediate	2	5 GCSE passes at Grades A*– C or 9 – 4
Advanced	3	2 A level passes
Higher	4, 5, 6 and 7	Foundation degree and above
Degree	6 and 7	Bachelor's or master's degree

All apprenticeships include elements of on the job and off the job training leading to industry recognised standards or qualifications. Some apprenticeships will require an assessment at the end of the programme to assess the apprentice's ability and competence in their job role.

How do you apply?

At any one time there are between 12,000 – 20,000 apprenticeship vacancies available online in a variety of careers and industries across England. Visit **GOV.UK/apply-apprenticeship**. You can search by keyword (job role, occupation type or apprenticeship level) and by location.

Once the right job comes up, your son or daughter can simply register on the website and follow the step-by-step instructions to apply for the role.

Our YouTube channel has useful hints and tips on applying plus other videos on apprenticeships, visit YouTube and search apprenticeships/NAS.

If they are not quite ready for an apprenticeship or job, they could try a traineeship with a local employer to gain valuable work experience and the opportunity to improve their English and maths, if needed. Visit **GOV.UK/find-traineeship** for more information or to apply for traineeship opportunities.

Salaries

The minimum wage for apprentices is £3.70 per hour, but many employers pay more than this. This is dependent on the sector, region and apprenticeship level. E.g. some higher apprenticeships pay up to £500 per week.

More details on salaries and entry criteria in specific apprenticeship occupations can be accessed by looking at the vacancies on 'Find an apprenticeship'.

Entry requirements

Apprenticeships are available to anyone over the age of 16, living in England. There are different entry requirements depending on the sector and job.

Recent legislation has come into effect which changes the minimum English and maths requirements needed to complete an apprenticeship for people with a learning difficulty or disability. The changes will lower the English and maths requirements for these apprentices to an Entry Level 3 qualification.

A Disability Confident Employer will generally offer an interview to any applicant that declares they have a disability and meets the minimum criteria as defined by the employer. For more details, search Disability Confident on GOV.UK.

School leaving age

The government has stated that all young people must stay in some form of education or training until at least their 18th birthday. This does not necessarily mean staying in school; young people have a choice about how they continue in education or training post 16, which could be through an apprenticeship or traineeship.

Search apprenticeships on GOV.UK

'KUDOS' – Online Careers Guidance

To support the delivery of impartial and independent careers guidance, the school has purchased an online careers package to assist our students with their career and study options.

The **Kudos** online careers guidance and information program helps them to plan their future by getting them to think about possible career directions, make informed decisions and helps to raise their aspirations and achievement. The program is free to use and can be accessed both at school and from home, allowing parental involvement and support.

Young people explore career ideas in **Kudos** through four starting points:

1. **MyFuture** – take the test by answering Likes and Dislikes questions to give you a personalised list of career ideas you might like.
2. **Explore Work Areas** – explore the careers available in a particular area of work.
3. **Explore Subjects** – search for careers according to the subjects you like.
4. **Explore Careers** – find a career that you want to know more about and see if it is suitable for you.

Students can work through the program at their own pace. They can view detailed careers information on over 1,800 job titles and explore how well matched they are to them based on their interests and educational aspirations. **Kudos** also includes labour market information, videos and real life case studies, as well as links to university courses and live apprenticeship vacancies.

To access the program go to the Oathall website (www.oathall.org) and under 'Quick Links' on the homepage, select 'Career Cascaid'. Click 'Login' and then select Kudos and log in with your school username and password.

If you are asked to change your password **DO NOT DO THIS**, and instead click on 'continue without changing password'.

The first time you use the program you will be asked to confirm a few personal details and to select the qualification level you eventually hope to achieve.

Careers Websites

Here are some websites and online services to help you with your post 16 and career choices.
