Spring 2	
Summer 1	Unit RO57- Health and well-being for child development An exam based module which has a class workbook and homework booklet marked every 3 weeks

Homework expectations: It is expected that students will do 1 hour per week of homework. This can follow a number of formats, for example worksheets, coursework or revision.

What does homework look like in this subject at KS4?

Students follow a homework book which consolidates the theory learnt in the lessons via worksheets and questions. They will use their homework time to revise for end of topic tests and for the final exam.

When doing the coursework elements students will ensure they use homework time to be up to date with the required interim deadlines along the way.
