April 2024

Dear Students,

We've put together this guide to help you locate all the information you need as you consider what you will do when you leave Oathall in 2025.

You must continue in education or training until the end of the school year in which you turn 18. This can be at a school, college, with a specialist provider or in a workplace. We are fortunate to be in an area that has a huge number of colleges, sixth forms and apprenticeship providers, so there really is something for everyone.

This booklet contains information about qualifications and colleges, and explains the application process. There is also a section on apprenticeships and work-based learning. Please refer to individual college websites for full details of the courses they offer, entry requirements, open days and events and application deadlines.

We recommend that you attend as many open days and events as you can, to help you make an informed decision about where you will go next. Applications are done online via the colleges' websites.

Please contact Ms Lazell via email ([mlazell@oathall.org](mailto:mlazell@oathall.org)) or pop in to see her in the careers office if you need any assistance with completing application forms, discussing course choices or anything college/career related. She will be carrying out careers meetings with all Y11 students during the Autumn term. She also posts all information about colleges, work experience, careers talks etc in the Work Related google classroom so keep an eye out there, too.

Choosing where you want to go when you leave school is an exciting time, but can also feel daunting. If you have any worries you can talk to your tutor, Mrs Powell, Mrs Staplehurst or any of your subject teachers, and Ms Lazell is always available in the careers office.

Yours sincerely

Ms L Griffiths

Assistant Headteacher

Mrs D Isley

Careers Lead & Vocational Manager

Ms M Lazell

Careers Advisor

# UNDERSTANDING QUALIFICATIONS

The level of a qualification determines how demanding the course will be - the higher the level, the more difficult the qualification.

LEVEL	QUALIFICATION		
8		DOCTORATE/PhD	
7	LEVEL 7 NVQ	MASTER'S/POST-GRADUATE DIPLOMA	
6	HIGHER , DEGREE APPRENTICESHIP	HONOURS DEGREE	
5		FOUNDATION DEGREE, HND	DipHE
4		HNC	CertHE
3	ADVANCED APPRENTICESHIP	LEVEL 3 NVQ, BTEC or CAMTEC	A LEVELS, T LEVELS, EPQ, INTERNATIONAL BACCALAUREATE
2	INTERMEDIATE APPRENTICESHIP	LEVEL 2 NVQ, BTEC Level 2 Pass, Merit or Distinction	GCSE - grade 4-9
1	TRAINEESHIP	BTEC Level 1 Pass, Merit or Distinction	GCSE - grade 1-3

## UCAS Tariff Points

A Level grade	BTEC grade	UCAS tariff points
A*	DISTINCTION*	56
A	DISTINCTION	48
B		40
C	MERIT	32
D		24
E	PASS	16

## Going on to University

Most universities will offer a place conditional on the grades you achieve for three A Levels, BTecs, a T Level or a certain score in the International Baccalureate.

Music, dance and drama exams at grade 6 and above carry a UCAS Tariff, and are a fantastic achievement to put on your application forms and talk about at interview. But you shouldn't rely on this to 'make up' points unless the university has explicitly said it will accept this.

Similarly, universities will not offer a place conditional on four A Levels - if they ask for A\*AA, then they may not give you a place if you get AAAA. Generally speaking quality of learning matters more than quantity, especially if combined with an EPQ, extra-curricular hobbies, volunteering or other interests.

# OPTIONS AT 16+

## A Levels

Subject-based qualifications, usually assessed by exams at the end of the second year. Can be taken in conjunction with BTECs; most students choose 3 subjects in total. If you achieve mainly 8s and 9s in your GCSEs you may consider taking a 4th A Level.

**Typical entry requirement:** five GCSEs at grades 4-9 including English Language and Maths, plus subject-specific requirements, eg: a grade 6 in Maths if you want to do Maths or Physics A Level.

## T Levels

Equivalent to three A Levels. T Levels have a mix of classroom and 'on the job' experience, with an industry placement of at least 315 hours (approximated 45 days) over the two years. Some colleges offer transitional T Levels for students who do not achieve the entry requirements in Y11.

**Typical entry requirement:** five GCSEs at grades 4-9 including English Language and Maths.

## Level 3 BTECs, CAMTECs and WJEC Diplomas

Specialist vocational qualifications, which combine practical and classroom-based learning. Assessed by coursework and exams. There are single, double and triple options in some subjects, which are equivalent to one, two or three A Levels respectively. These qualifications meet the entry requirements for many, though not all university courses, especially if studied in combination with A Levels. See [www.ucas.com](http://www.ucas.com) and individual university websites for more details.

**Typical entry requirement:** five GCSEs at grades 4-9 including English Language and Maths.

## Level 2 BTECs

For some vocational subjects, eg: barbering, you will need to complete the relevant one-year Level 2 course at college before progressing on to the Level 3 course, even if you have straight 9s at GCSE. For many vocational subjects, eg: Creative Media, you can use a Level 2 course as a stepping stone to Level 3 if you don't meet the entry requirements to go straight to the Level 3 course.

## International Baccalaureate

The IB is only offered at Varndean, and some independent sixth forms. It is a rigorous and challenging course, broadly equivalent to four A Levels, and is an internationally recognised qualification.

Students taking the IB study six subjects which cover humanities, science, Maths, English and a modern foreign language. They also do a 'theory of knowledge' course, and participate in creativity, action and service projects.

**Typical entry requirement:** seven GCSEs at grades 6-9 including English Language, Maths, and Science.

## Extended Project Qualification

If you are aiming to study at a top university you should seriously consider taking the EPQ. It involves independently researching and writing a 6,000-word dissertation, and is equivalent to half an A Level. Universities value the EPQ as preparation for higher level study.

**Typical entry requirement:** six GCSEs at grades 6-9 including English Language, Maths, and Science

**It is a statutory requirement that all students retake Maths and English Language GCSE if they do not get at least a grade 4 pass in Y11. These retakes can be taken alongside A Levels and BTECs if other entry requirements are met, or alongside a Level 2 study programme for a year. Students can then progress to Level 3 courses the following year.**

# COLLEGES

## BACA

Lewes Road, Brighton BN1 9PW

# COLLEGE APPLICATION TIME LINE

# BEFORE YOU APPLY

Before you make your applications, you need to do some research. Go to as many open days as you can, and talk to your parents, carers and teachers about what you're thinking of applying for. If you have an older sibling who has been to college, or is currently there, you could ask them, too.

## THINGS TO THINK ABOUT

**Courses** Not all courses are available at all colleges so make sure you check what each college has to offer.

**Entry requirements** For Level 3 courses (eg: A Levels, Level 3 BTecs) most colleges will have general entry requirements, normally five GCSEs at grade 4 or above including Maths and English Language. On top of this, some courses have specific entry requirements, which can vary between colleges, e.g. to study Psychology you may need GCSE science at grade 6 and English at grade 6.

**Course content** Look carefully at the modules within a course. These can vary considerably at different colleges as they use different exam boards.

**Assessment** Look at how the course is assessed, e.g. most A levels are 100% examination, whereas Vocational Qualifications including BTECs, Cambridge Nationals etc include a practical element and coursework.

**Progression** Is this the right course or combination of courses to meet the entrance requirements for the subject you wish to study at university? E.g. to study medicine you must have A level Chemistry. The UCAS website is very useful for researching this [www.ucas.com](http://www.ucas.com)

**Facilities** What else does the college offer to support learning?

**Extra-curricular activities** What clubs and societies does the college offer?

**Results** Look at the individual subject pass rates for the subjects you are interested in studying, not just the overall results for the whole college.

**Travel** Can you get there? Consider the time and cost. Think about making that journey on a cold, wet February morning, not just a sunny June afternoon. Be realistic.

**Guidance** Do they offer careers support and guidance for university applications or your chosen next step?

**'Feel'/ethos** Do you like it?

**You are more likely to succeed if your choices fit your interests and abilities.**

# THE APPLICATION PROCESS

## Applying for college

There is no set number of colleges you have to apply for, but we recommend applying to three different places. You can apply for the same subjects, or completely different ones for each college.

Applications are made via the colleges' websites. When you apply, **use your home email address**, not your school one - you will need to access this after you leave Oathall, by which time your @oathall.org email address will be deactivated. Use a sensible, professional email address, eg: jsmith@gmail.com, not ilovecheese@gmail.com. Create a new one if necessary.

Once you have submitted your application you should get an automatic acknowledgement email - check your spam folder in case it goes in there. You will then get an email inviting you for interview. This can take a few weeks, so be patient!

**Please note:** You **cannot** apply to both Varndean and BHASVIC. This is so the two colleges can effectively plan their curriculums. If you apply to both the colleges will contact you to ask you to withdraw one application before the other one offers you an interview.

**The application deadline is Friday 6th December 2024. You may be able to apply after this date, but priority will be given to applications received by the deadline.**

## References

Please put **Ms Lazell** down as your school reference - her email is mlazell@oathall.org and her phone number is 01444 883220. The colleges will then contact her to ask for your predicted grades, and also for information on your attendance, punctuality and behaviour during Y10 and 11.

## College interviews

If your interview time is during the school day your parents/carers should email Mrs MacDiarmid (tmacdiarmid@oathall.org) so she can mark you in the register as authorised absent, as she would do for an orthodontist appointment.

Even if your interview is after school **we recommend wearing your school uniform** (shirt tucked in, no rolled skirts!) - you will look smart and not have to worry about choosing an outfit.

If you are applying for an art or creative course you may be asked to provide a portfolio of your work, which can be your GCSE coursework and/or art you have done outside school. If you are applying for a music, dance, drama or performance course you may be asked to audition.

Remember, the interview is as much for you to find out about the college as for them to find out about you. You can discuss course choices and alternative options, which is particularly important if you are applying for a subject you haven't studied before such as Sociology or Law. **Ask lots of questions** - how many people will be in each class? What out of class support do you offer? Where do students go in between classes? What's the best deal in the canteen?

## Accepting offers

**We strongly advise you to accept all the offers you are made.** When you get your results in August you can then make your final decision about which college to go to, and can email the ones you don't want to go to and politely decline the place. Please don't worry about appearing rude, this is completely standard practice and the colleges expect this.

# WORK-BASED LEARNING

This option suits students who know what they want to do for a living. You can leave school and start work-based training with an apprenticeship. Typically this will mean four days a week in the work place, and one day a week in college or at a training centre. Apprentices are paid, usually the national minimum wage, which for a 16 year old is currently £6.40 per hour.

Apprenticeships take between one and five years to complete. They are available in a wide range of industries, eg: accountancy, business administration, animal care, catering, construction, customer service, engineering, hairdressing, health & social care, IT, law, motor industry, retail, telecommunications and many more. Apprenticeships are now available up to degree level and beyond.

## Intermediate Apprenticeship (Level 2)

- Entry requirements vary. Some require specific qualifications such as GCSEs in Maths and English at grade 4 or above. Others require you to pass an initial assessment.
- Trainees will be paid a training wage and work towards qualifications in NVQs, Functional Skills and Technical Certificates.
- Usually takes one year to gain a level 2 (equivalent to five GCSEs grades 9-4) after which it should be possible to progress to level 3.
- Training may take place solely in the workplace or on day release courses at college.

## Advanced Apprenticeship (Level 3)

- Equivalent to at least two A levels.
- For 16+ year olds who have gained a minimum of five GCSEs at grades 9-4.
- Trainees will be paid a training wage and work towards qualifications in NVQs, Functional Skills and Technical Certificates.
- Training may take place solely in the workplace or on day release courses at college.
- Usually takes two years to complete and it is possible to progress to a Foundation Degree at university.

## Higher Apprenticeships (Level 4 and above)

Higher Apprenticeships offer ambitious existing apprentices and employees, as well as A-Level school leavers, a different route to traditional university study. There are more than 40 Higher Apprenticeships to choose from and apprenticeships at degree level are now available. Occupational areas include Accounting, Advertising & Marketing, Banking, Business, Construction, Engineering, Fashion & Textiles, Hospitality, IT & Web Professionals, Legal Services, Life Sciences; with many more in development.

## How to Apply for Apprenticeships

To do an apprenticeship you will need to find an employer, much the same as looking for a job. Visit [www.gov.uk/apply-apprenticeship](http://www.gov.uk/apply-apprenticeship) to register, search and apply for apprenticeship positions nationwide.

You can also look at local apprenticeship providers' websites to find apprenticeship opportunities in our area. These websites may be useful:

[www.apprenticeships-in-sussex.com/](http://www.apprenticeships-in-sussex.com/)

[www.rewardstraining.co.uk](http://www.rewardstraining.co.uk)

[www.jace-training.co.uk](http://www.jace-training.co.uk)

[www.sigta.co.uk](http://www.sigta.co.uk)

[www.stevewillis.com](http://www.stevewillis.com)

[https://talentview.org/vacancy?opportunity\\_type=apprenticeships](https://talentview.org/vacancy?opportunity_type=apprenticeships)

<https://apprenticeshipguide.co.uk/>

<https://www.getmyfirstjob.co.uk/>

You can also approach local employers in your chosen sector to enquire about possible apprenticeship opportunities.

**If you are considering an apprenticeship you should also, as a back-up measure, make a college application for a full-time course in the area you are interested in. If you do not find a job before the start of the college year you should start on the full-time course. If at any time during the full-time course you manage to find a suitable job, you can be transferred on to the apprenticeship programme subject to various conditions being met by your employer.**

## Traineeships

A traineeship is a course with work experience that gets you ready for an apprenticeship. It can last up to six months, and you will get help with Maths and English if you need it. You won't be paid, but you may be given expenses for things like travel and meals. You can apply if you're:

- eligible to work in England
- unemployed and have little or no work experience
- aged 16-24 and qualified below Level 3

visit **[www.gov.uk/find-traineeship](http://www.gov.uk/find-traineeship)** to register and apply for traineeships, or contact colleges and training providers to see if they are offering traineeship opportunities.
