Adverse Weather Conditions

In extreme or severe weather conditions a decision about whether the college will be closed will be made as soon as possible. Many factors need to be considered in determining if we can operate the college safely. Please appreciate that this may take time. If a decision is taken to close the college this information will be posted on our website and if feasible a notification will be sent out using other communication channels (MCAS, text etc.). Parents and students are encouraged to look there in the first instance. Staff will always be on site to look after any students if a decision to close is made at the last minute or during the school day.

Remote learning

In the event of a school closure, please refer to the [remote learning section](#) on our website. Our main platform for remote learning is via Google classroom. Google classroom codes for remote learning can be found on this page and are listed by year, subject and in some cases by teaching group as well. Please be sure to check that you have the correct code. Please note that you can only obtain access to remote learning provision if you are a member of the Oathall community with an Oathall email address. If you have any questions about work contact the relevant subject teachers directly via email. For wider queries please email remotelarning@oathall.org

External GCSE examinations

Please note that in the event of adverse weather examination boards will make no changes to the schedule of public exams for year 11 students. Should adverse weather affect the normal running of the college we will make every effort to run public exams, provided this can be done safely. Should a student's normal means of transport to school be affected please make every effort to arrange a safe alternative. Please monitor the website for further information. We hope, of course, that we do not need to operate these procedures.

Mr Toby Houghton
