

# **Curriculum Overview**

#### **Portway Primary School**

# Year 5

Term – Summer 1

#### Science

#### **Physics - Earth and Space**

This year we have increased our learning through investigation. Each half term we have a concluding investigation question that we try to solve based on what we have learnt during the half term. Our question this term is:

#### How can we measure the movement of the Earth?

In order to answer this question they will be learning how to:

- Describe the movement of the Earth, and other planets, relative to the Sun in the solar system.
- Describe the movement of the Moon relative to the Earth.
- Describe the Sun, Earth and Moon as approximately spherical bodies.
- Use the idea of the Earth's rotation to explain day and night and the apparent movement of the Sun across the sky.

# This term we will be learning about...

# UK (Essex)

We will be visiting Colchester Thursday 22nd May 2025.

#### **Humanities**

Please refer to the fact organiser at the end of this document for details about our Geography topic: UK (Essex)

# Art

This term, children will be looking at why gargoyles were made. They will look at the history of an artist called David Mach, who was famous for creating 3D sculptures. Children will learn about the different techniques which are used to create a gargoyle before creating their own. They will be reflective of their artwork and consider ways in which it can be developed.

### **RSHE - My relationships**

This term the children will learn to apply positive qualities of themselves so they can have strong self-esteem. They recognise the impact of being part of an online community positive and negative consequences. Finally they will outline the rights and responsibilities that everyone in an online community or social network should have and uphold, summarising the rights and responsibilities when playing games and communicating with others online.

# **Curriculum Overview**

**Portway Primary School** 

# English

In Reading, pupils will develop their ability to justify inferences on a character's motives while discussing the meaning of words in different contexts. Children will participate in discussions, structured role-play activities and will be expected to support their opinions with evidence from the text. In Writing, pupils will continue developing their skills through practising, applying and mastering them in a wide variety of genres. These include using a variety of sentences, figurative language, parenthesis, adverbials and modal verbs through descriptive, persuasive and poetry writing. This half term the key text is: Counting on Katherine by Helaine Becker.

#### RE

Year 5 pupils will be taught to use what they have been taught previously to analyse and evaluate different religions and how they affects daily living. In Year 5 pupils will be taught to consider and discuss ideas and themes, apply ideas from religious and world views thoughtfully and connect ideas from different religions and say what they share, and their impact on the lives of follower.

#### **Mathematics**

This unit continues to strengthen children's understanding of decimals, fractions and percentages. Children will develop fluency with common decimals, fractions and percentages, and will learn a range of strategies to convert between equivalent decimals, percentages and fractions. This will prepare children for more complex work with decimals, fractions and percentages in future units. They will then move on to develops their geometric reasoning alongside key measurement skills. The skill of measurement is developed alongside reasoning and calculating to allow children to make predictions, to check their calculations and to discuss the properties of shapes and angles that they are to explore.

#### Computing

In this unit, pupils will start to create vector drawings. They will learn how to use different drawing tools to help them create images. Pupils will recognise that images in vector drawings are created using shapes and lines, and each individual element in the drawing is called an object. Pupils will then layer their objects and begin grouping and duplicating them to support the creation of more complex pieces of work using Google.

### You might like to join in with our learning at home by:

<b>Doing</b> Why not visit a town in Essex or use Google maps to make a virtual visit? Revise times table facts up to 12x12 and use Times Table Rockstars daily.	Visiting An old church like Westminster Abbey to see the gargoyles in situ.

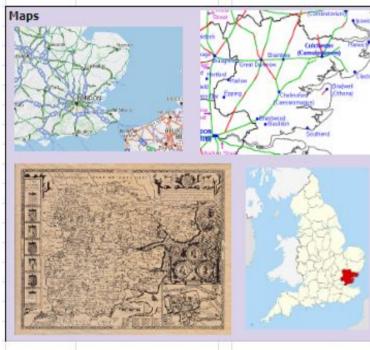

# Year 5 - Geography. Final Enquiry: What will Essex be like in 50 years?

Essex is a county in the East of England which is low lying, with a flat coast.	
Southend on Sea is a popular coastal city bordering the Thames estuary.	
Colchester was a Roman port and fortress surrounded by farmland. Chelmsford is a commuter town.	
Essex has been continuously settled since the Stone age when it was developed as farmland.	
Colchester was the first Roman town attacked by Boudicca resulting in Londonium becoming the Capital city.	
After WW2 the main trades became superfluous and Essex became an extension to London.	
Essex has a strong tourist trade, with tourists largely visiting the resort towns and forests.	
Habitat destruction for housing and increased pollution have caused a reduction of biodiversity in the area.	
tourism? Some initiatives to increase biodiversity are unpopular with locals who do not want to make way for animals.
