

WELCOME TO

# LANGUAGES WEEK!

# WHAT IS THE MOST TRANSLATED WORD IN THE WORLD?

IF YOU MET SOMEONE NEW AND  
COULD ONLY SAY ONE WORD IN  
THEIR LANGUAGE WHAT WOULD IT  
BE?

(YOU CAN WAVE TO SAY HELLO!)

Beautiful

It's official: the most common word translated via Google Translate is "beautiful," according to a joint project from Google News Lab and data visualization company Virtual Cinnamon. Closely following this are words like "good," "love," and "mama." Indeed, many of the top 10 commonly translated words have positive connotations, and according to a [brief coverage](#) by Wired, if anything, it's a hopeful reminder that in spite

of language barriers, the words people want to express the most reflect positivity.
