

# GCSE Support Evening

19/09/23

# The Purpose of This Evening

- To ensure parents feel informed and supported about the challenge ahead.
- To hear from students that were in your shoes last year.
- To give advice to students and parents about learning at home.

# Year 11 Key Contacts

## Head of Year

Mr. Waterworth

## Form Tutors

Mrs. Barrow

Miss. Hart

Mrs. Holcroft

Mr. Hughes Alty

Ms. Jones

Mr. Nichols

Mrs. Parkinson

Mr. Wigham

Mrs. Williams

# KEY DATES

# Year 11 Key Dates

## Assessments

1st Assessment Week - 25/09/23

Christmas Mocks - 04/12/23

Easter Mocks - 11/03/24

GCSE Start - 09/05/24

## Parents Evenings and Reports

First Report - 30/10/22

Parents Eve - 17/01/24

Parents Eve - 17/04/24

# Period 6

Starts on Monday 25th September.

Strongly recommend students to attend if they have a session.

<b>Week A</b>	Mon	Tue	Wed	Thu	Fri
	Opt B	English		Maths	F. Maths
<b>Week B</b>	Mon	Tue	Wed	Thu	Fri
	Opt C	Opt A		Science	F. Maths

# Period 6 Rewards (Sep-Dec)(Jan-April)

100% attendance to all period 6: Draw for £50, £30, £20 vouchers

100% attendance to subject period 6: Draw for free prom ticket

Period 6 Hard worker award: 1st £50 voucher, 2nd £30 voucher, 3rd £20 voucher

Period 6 highest attending form: Reward trip to those who attended

A meme featuring Woody and Buzz Lightyear from the movie Toy Story. Woody is on the left, looking slightly concerned. Buzz is on the right, wearing his signature green and purple space suit, with his arms raised in a dramatic gesture. The background is a simple room with a door and some yellow star-shaped confetti or lights. The text "DISTRACTIONS" is overlaid at the top, and "DISTRACTIONS EVERYWHERE" is overlaid at the bottom.

**DISTRACTIONS**

**DISTRACTIONS EVERYWHERE**

# Effective Revision Conditions

NO MOBILE DEVICES

Quiet space

Away from all distractions

Have a designated area that isn't located in your relaxing zone

Take advantage of your school environment

Meeting with people can **SOMETIMES** be beneficial

# TOP TIPS

(students)

Take class tests/mocks seriously

Eat breakfast and ensure you get enough sleep

Use the schools/exam resources

Start early !!!! (Now!)

Remember to take regular breaks

Use a revision app

Revise the aspects you struggle with and not just what you enjoy/are good at

Get the spec!

# TOP TIPS

Test your child

Offer emotional support

Enforce time for a break and mobile phone rule

Ensure they've created a revision timetable

Leave them/give them space when working

Organise an area for study

Help them get organised; Folders, postcards, etc

Ask what's going on –but light-touch

Check progress & completion of homework

Breakfast & water

# Wellbeing Action Calendar

# TEN STEPS TO MINDFULNESS MEDITATION

**Create time & space.**  
Choose a regular time each day for mindfulness meditation practice. Identify a quiet place free from distractions.

**Set a timer.**  
Start with just 5 minutes and over time may up to 15-30 minutes.

**Find a comfortable sitting position.**  
Sit cross-legged on the floor, on the grass, or in a chair with your feet flat on the ground.

**Check your posture.**  
Sit up straight, hands in a comfortable position. Keep neck long, chin tilted slightly downward, tongue resting on roof of mouth. Relax shoulders. Close eyes or gaze downward 5-10 feet in front of you.

**Take deep breaths.**  
Deep breathing helps settle the body and establish your presence in the space.

**Direct attention to your breath.**  
Focus on a part of the body where the breath feels prominent: nostrils, back of throat, or diaphragm. Try not to switch focus.

**Maintain attention to your breath.**  
As you inhale and exhale, focus on the breath. If attention wanders, return to the breath. Let go of thoughts, feelings or distractions.

**Repeat steps 6-7.**  
For the duration of meditation session. The mind will wander. Simply acknowledge this and return to your breath.

**Be kind to yourself.**  
Don't be upset if focus occasionally drifts or if you fall asleep. If very tired, meditate with eyes open and rearrange posture to more erect (but still relaxed) position.

**Prepare for a soft landing.**  
When the timer goes off, keep eyes closed until you're ready to open them. Be thankful. Acknowledge your practice with gratitude.

# Using Weekly Analysis Grid to Revise...

Select Videos from the bar at the top, then search by clip number or by topic using words.

**Clip 117**  
Area of a Circle

The screenshot shows the MathsWatch website interface. At the top, there is a navigation bar with the MathsWatch logo and links for Classes, Assignments, Users, Videos, Usage, Feedback, Extras, and Help. A user account for 'Louise's account' is logged in, with a 141-day renewal period. A referral scheme banner offers to reduce the subscription cost to £0. The main content area is titled 'Clip 117 Area of a Circle' and includes tabs for 'One Minute Maths', 'Interactive Questions', and 'Worksheet'. The video player displays the text 'Clip 117' and 'AREA OF A CIRCLE' over a blue background. A search sidebar on the right allows filtering by Qualification (GCSE), Tier (All), Grade (All), and Topic (All), with a search box containing '117'. Below the search filters, a 'Choose Clip (1)' section shows a single result: '117 Area of a Circle'.

# Using Weekly Analysis Grid to Revise...

We recommend that pupils watch the video, make a revision card and try the interactive questions.

To the right, there is a search filter section with dropdown menus for Qualification (GCSE), Tier (All), Grade (All), and Topic (All), along with a search box containing '117'. Below this is a 'Choose Clip (1)' section with a table listing the clip: '117 - Area of a Circle'.

# Home Learning (Homework)

- An online homework task is set on Mathswatch weekly (to help revise for upcoming weekly assessments)
- A 2nd homework task is set on paper weekly (to help keep previous topics fresh)
- Both are set on Wednesdays, due the following Wednesday
- Students should do extra on top of this when revising and preparing for exams and assessments.

# Questions you may want to ask your child on a weekly basis

- Have you completed your homework on Mathswatch and on paper?
- Can you show me what you have been working on this week as part of your revision?

# We need your help and support

- Attendance
- Punctuality
- Keep us informed
- Behaviour
- Equipment
- Revision
- Coaching

# GCSE Science - How can you help with science revision

# GCSE Combined Science (Trilogy)

- **Final Examination Assessments only**
- 6 papers each 1 hour 15 minutes (7-1/2 hours of examination)
- 2 x biology, 2 x physics, 2 x chemistry
- 70 marks per paper
- 2 grades awarded, 9-9 down to 1-1. Grade 4-4 is a low grade pass. Can achieve 5-4, 9-8 etc.

# GCSE chemistry/biology/physics

- **Final Examination Assessments only**
- 6 papers each 1 hour 45 minutes (10-½ hours examination)
- 2 x biology, 2 x physics, 2 x chemistry
- 100 marks per paper
- 3 grades awarded, 9 down to 1. Grade 4 is a low grade pass.

# Assessment Objectives (AOs)

Assessment objectives (AOs) are set by Ofqual and are the same across all GCSE Combined Science: Trilogy specifications and all exam boards. The exams will measure how students have achieved the following assessment objectives.

- AO1: Demonstrate knowledge and understanding of: scientific ideas; scientific techniques and procedures. (40%)
- AO2: Apply knowledge and understanding of: scientific ideas; scientific enquiry, techniques and procedures. (40%)
- AO3: Analyse information and ideas to: interpret and evaluate; make judgments and draw conclusions; develop and improve experimental procedures. (20%)

# Revision - Little and Often

- Equipment required: notebook, index cards, paper, revision guides/textbooks, laptop.
- Fitting science revision into their regular practice is a great way of making it seem less overwhelming. Start with areas they find the hardest.
- Use a variety of resources:
  - Seneca learning
  - Revision Guides
  - Online videos
  - Practice papers and GCSE Questions
- Sit down with your child and make sure they're really getting the topics they're covering. Learning to recognise their weak spots and to pinpoint the moment when they start to understand for themselves is key to improving their metacognition and their skills for life beyond school.

## Practical tips:

- Follow the same revision timetable as the science teachers. (A timetable for classes has been made available). This helps the students when they come into lessons having already revised the topic.
- Use the revision guides or textbooks to test them.
- Identify areas of weakness and focus on these areas more to make the most progress.
- Practice questions (SLOP!)

# How to use the textbooks to help with revision

## Learning Objectives:

- Know that the rate of energy transfer (or work done) is power.
- Know that power is measured in watts, W, and  $1 \text{ W} = 1 \text{ J/s}$ .
- Know and be able to use both  $P = E \div t$  and  $P = W \div t$ .
- Be able to describe examples which illustrate the definition of power, e.g. that show that the higher the power, the less time it takes to supply a given amount of energy.

Specification Reference  
6.1.1.4

Tip: These formula triangles might help with rearranging the power equations:

$$\begin{array}{c} E \\ \hline P \times t \end{array}$$

$$\begin{array}{c} W \\ \hline P \times t \end{array}$$

## 4. Power

Power is a really important concept that pops up all over the place because power is all about how quickly energy is transferred.

### What is power?

Power is the rate of energy transfer, or the rate of doing work. Power is measured in watts, W. One watt is equivalent to one joule transferred per second (J/s).

You can calculate power using these equations:

$$P = \text{power (W)} \rightarrow P = \frac{E}{t} \quad \text{where } E = \text{energy transferred (J)}$$

$$P = \text{power (W)} \rightarrow P = \frac{W}{t} \quad \text{where } W = \text{work done (J)}$$

$t = \text{time (s)}$

### Example

A motor transfers 4.8 kJ of energy in 2 minutes. Find its power.

Energy transferred = 4.8 kJ = 4800 J  
Time taken = 2 minutes =  $2 \times 60 \text{ s} = 120 \text{ s}$

$$P = \frac{E}{t} = \frac{4800}{120} = 40 \text{ W (or 40 J/s)}$$

### Example

How long does it take for a 550 W motor to do 110 J of work?

$$\begin{aligned} \text{Rearranging } P &= W \div t \\ E &= W \div P \\ &= 110 \div 550 \\ &= 0.2 \text{ s} \end{aligned}$$

A powerful machine is not necessarily one which can exert a strong force (although it usually ends up that way). A powerful machine is one which transfers a lot of energy in a short space of time.

### Example

Consider two cars that are identical in every way apart from the power of their engines. Both cars race the same distance along a straight race track to a finish line. The car with the more powerful engine will reach the finish line faster than the other car — i.e. it will transfer the same amount of energy, but over less time.

### Example

It takes 8000 J of work to lift a stunt performer to the top of a building. Motor A can lift the stunt performer to the correct height in 50 s. Motor B would take 300 s to lift the performer to the same height. Which motor is most powerful? Calculate the power of this motor.

Both motors transfer the same amount of energy, but motor A would do it quicker than motor B. So, motor A is the more powerful motor.

Plug the time taken and work done for motor A into the equation  $P = W \div t$  and find the power.  
 $P = W \div t = 8000 \div 50 = 160 \text{ W}$

### Practice Questions — Fact Recall

- Q1 What is meant by the term 'power'?
- Q2 State the equations for power. What does each term represent and what units are they measured in?

### Practice Questions — Application

- Q1 Find the power of the following:
- A motor that transfers 150 J of energy in 37.5 s.
  - A motor that transfers 79.8 kJ of energy in 42 s.
  - A motor that transfers 6 840 kJ of energy in 9.5 minutes.
- Q2 Two lifts, A and B, operate between the ground floor and the second floor of a building. Lift A's motor has a power of 4800 W, and lift B's motor has a power of 5200 W. State which of the two lifts will carry a given load up the two floors in the least time, and explain why.
- Q3 How long does each of the following take?
- A 525 W motor to do 1344 J of work.
  - A 2.86 kW toaster to transfer 1430 J of energy.
- Q4 How much energy do the following transfer?
- A machine with a power of 1240 W running for 35 s.
  - A 1500 W heater switched on for 17 minutes.

## Revision guides

- **SCOPAY**  
I have had all the literature revision guides added to SCOPAY for you to order.

These can be ordered as a bundle or you can select individual revision guides.

“life is what you make it!”

# How can students be supported at home?

Supporting your young adult to come up with a revision timetable - this is key!

Practising exam writing for English Language is vital - it is often timings that students struggle with. The Independent learning tasks for next term will have a variety of exam questions to support this. Can you start the timer? Do they know their **'cheat-sheet'/opener** - ask about this.

English Literature is slightly different. You could help with quote recall, discussing the social and historical context of the text, asking about the plot of the texts, can your young adult tell you about the characters - this includes the poetry anthology.

**“life is what you make it!”**

## What WE will do to support you?

As a team of staff we are here to:

- provide every revision material we have to help you practice
- guide you when you are uncertain
- give you our time to support you in period 6
- working with small groups to develop responses
- give you lots of praise for success
- listen and help!

My door is  
always open if  
you have any  
questions.

“life is what you make it!”

# What will homework look like?

- Term 1 a Knowledge organisers
- Term 1 b Knowledge organisers and fortnightly extended responses. These will be set week B.

My door is  
always open if  
you have any  
questions.
