

The Erasmus team at the Dales school welcomed our partners from Italy, France, Belgium and Spain last week.

The Team spent their first day looking around both sites and exploring our new train in our yard. In the afternoon the partners went on visits around the local area. They visited Alnwick and went to the castle and learnt to fly on their Harry Potter broomsticks. This was a huge success and the partners couldn't believe they learned to fly, as they thought this to be impossible. On another visit, they went to Beamish, and again they were blown away with the museum and all it had to offer. After all the fun it was time for business and the partners linked up with different classes around the school to see what we offer. They were so taken aback by all the work we do for our children that they stated it was a life changing way of looking at education. The project is a Maths based topic but The Dales School take a different look at maths and try to incorporate it into all aspects of the curriculum.

Patty Patty is at **Alnwick Castle.**

Erasmus+

Patty Patty is with **Donatella Maccagni** and **Maria Grazia Vairo** at **Dales School**.

8 May · Blyth, Northumberland · 🧑🏻‍🤝‍🧑🏻

Just returned from a 4 day Erasmus training in England at Blyth's Dales School near Newcastle. Dales School is a school for children with very specific needs. We have been able to exchange educational methods on the strategies put in place to help these and all children develop learning skills and above all be able to manage their own emotions by initially identifying them.

Dales School is also a school that works through projective education (garden, train wagon in the school yard,....).

Teachers, children have taken a place in our hearts, we will bring to school many ideas and activities to share with our colleagues. A special thank you to everyone see you in June for the meeting in Milan!

Back from 4 days training for 2 of our teachers at Dales School in Blyth near Newcastle. The Dales School is a school that welcomes children with very special needs. On the agenda: Exchange with English colleagues about the tools installed, developed specific learning skills and emotion identification techniques. The Dales School is also a school that operates solely on the pedagogy of the project (vegetable garden, railway wagon in the school yard,) . Rich exchanges ready to be shared and reinvested with colleagues at Feluy municipal school.

🇪🇺🇬🇧🇮🇹🇪🇸🇧🇪 Erasmus+ Osons math otherwise.
