

# KS5 Science

## ELLA HODGSON

Ella is a very dedicated student – she always works to the best of her ability and shows a real interest in her studies. She listens very carefully to explanations and will ask questions to further her understanding. She also has the ability to explain her ideas eloquently and passionately. Ella went above and beyond in Biology, choosing to take part in the Biology Olympiad - for which she was awarded a Bronze. Ella is continuing with her science education studying natural sciences at York where we wish her every success.
