

Year 12 Inspiration Award

SARAH REID

Sarah is a fantastic student who has studied a challenging curriculum of four A-Level subjects during Year 12. Sarah consistently shows maturity and commitment to her studies but goes the extra mile to help others and further develop her learning and knowledge beyond the classroom. Sarah has supported the peer school mentoring programme and during lockdown she entered the Cambridge Chemistry Challenge and began to further develop her learning through the use of open online courses (MOOCs) relating to her Science and Maths subjects. Sarah has taken part in the Maths Olympiad for Girls where she secured a silver medal award, the UKMT Senior Team Maths Challenge and also has attended an Oxford Physics Masterclass open day. Sarah is making amazing progress and is keen to study either natural or computer sciences at university, we believe Sarah is a true inspiration and very deserving of this award.
