

FORMULAE you need to know...

Angles

Sum of interior angles in a polygon
 $(n - 2) \times 180$

Probability

$$P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$$

$$P(A \text{ and } B) = P(A \text{ given } B)P(B)$$

Compound Interest

$$\text{Total accrued} = P \left(1 + \frac{r}{100} \right)^n$$

Where P is the Principle amount, r is the interest rate and n is the number of times that the interest is compounded.

Pythagoras' Theorem

Area

Rectangle – Length x Width
 Triangle – $\frac{1}{2} \times \text{Base} \times \text{Height}$
 Parallelogram – Base x Height
 Trapezium – $\frac{1}{2} (a + b) \times h$

Volume

Volume of a prism =
 Area of cross section x Length

Trigonometry

$$\sin \theta = \frac{\text{Opposite}}{\text{Hypotenuse}}$$

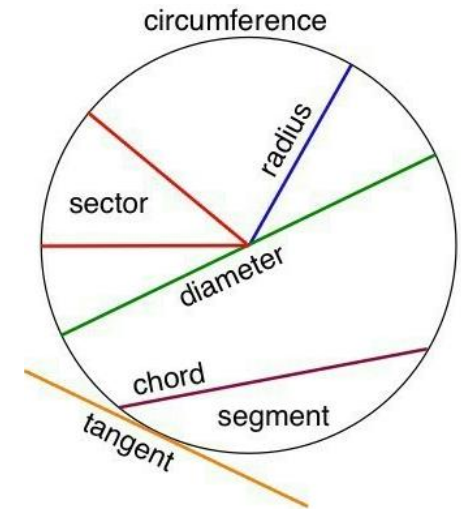

$$\cos \theta = \frac{\text{Adjacent}}{\text{Hypotenuse}}$$

$$\tan \theta = \frac{\text{Opposite}}{\text{Adjacent}}$$

Circles

$$\text{Area} - \pi r^2$$

$$\text{Circumference} - \pi d \text{ or } 2\pi r$$

Index Laws

$$x^a \times x^b = x^{a+b}$$

$$x^a \div x^b = x^{a-b}$$

$$(x^a)^b = x^{ab}$$

$$x^0 = 1 \quad x^{-a} = \frac{1}{x^a}$$

$$x^{\frac{a}{b}} = (\sqrt[b]{x})^a$$
